

Introducing *The City Guide*

A modern travel companion to explore Pakistan's best places, food & experiences
— all in one app.

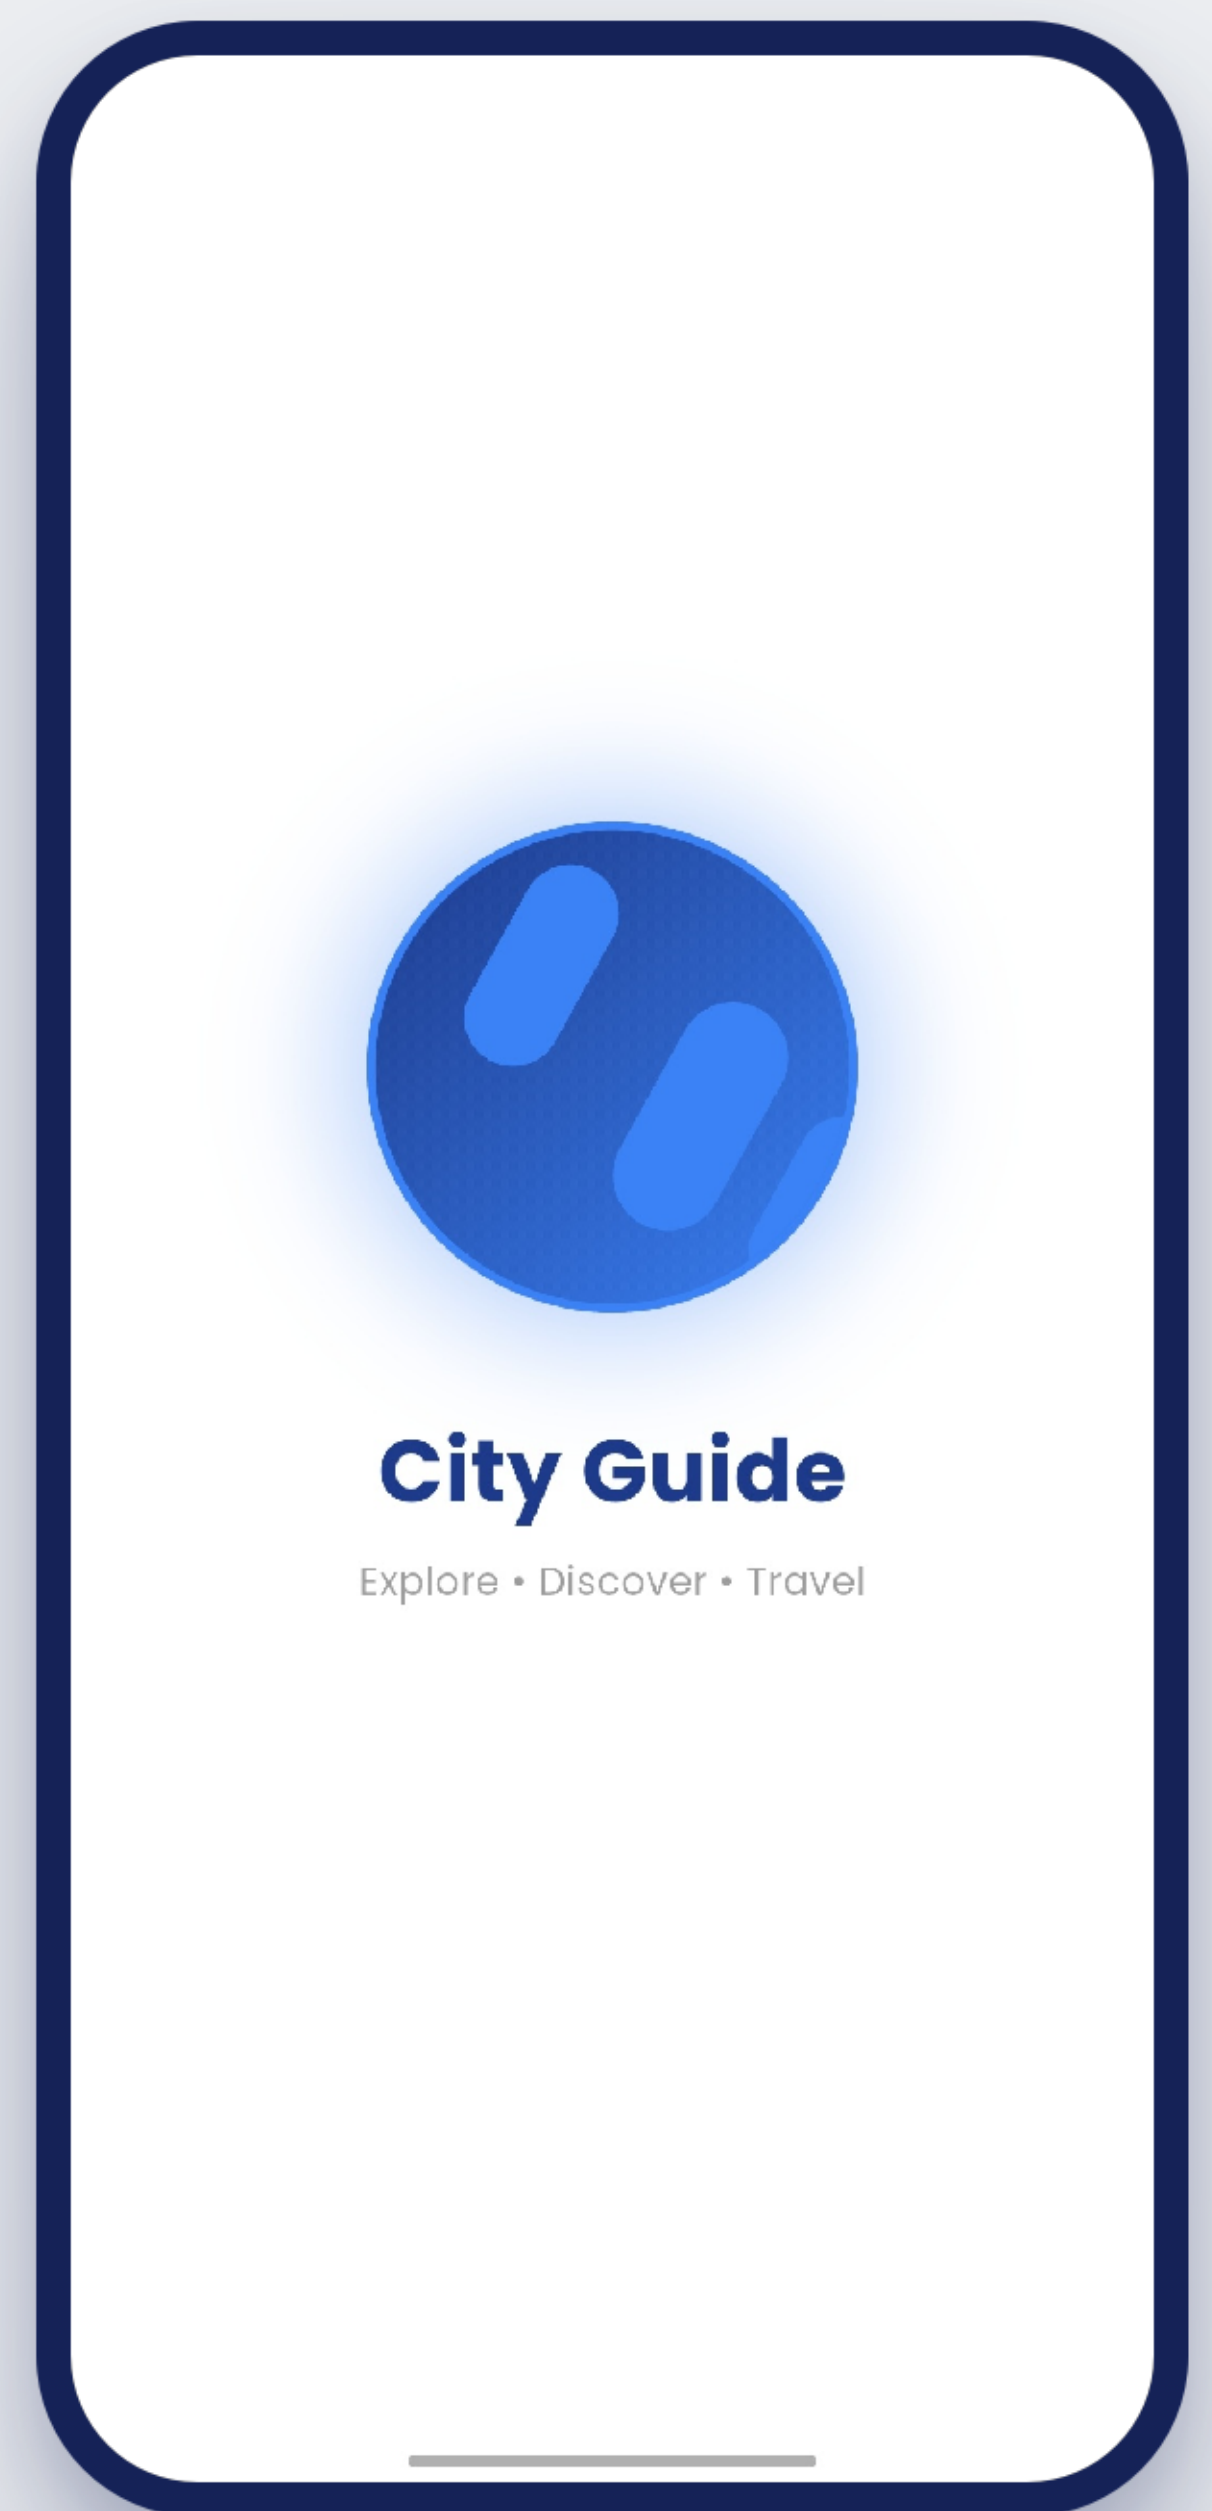

What is *The City Guide*?

The City Guide is a full-stack travel discovery platform for Pakistan — a user-facing app for exploring destinations, paired with a complete admin panel for managing every city, place, user, and review behind the scenes.

- 🔍 Explore places by city & category
- 📌 Save favorite spots & write reviews
- ★ Detailed info, ratings & highlights
- 🔒 Secure accounts for users & admins
- ⚙️ Full admin panel to manage the platform

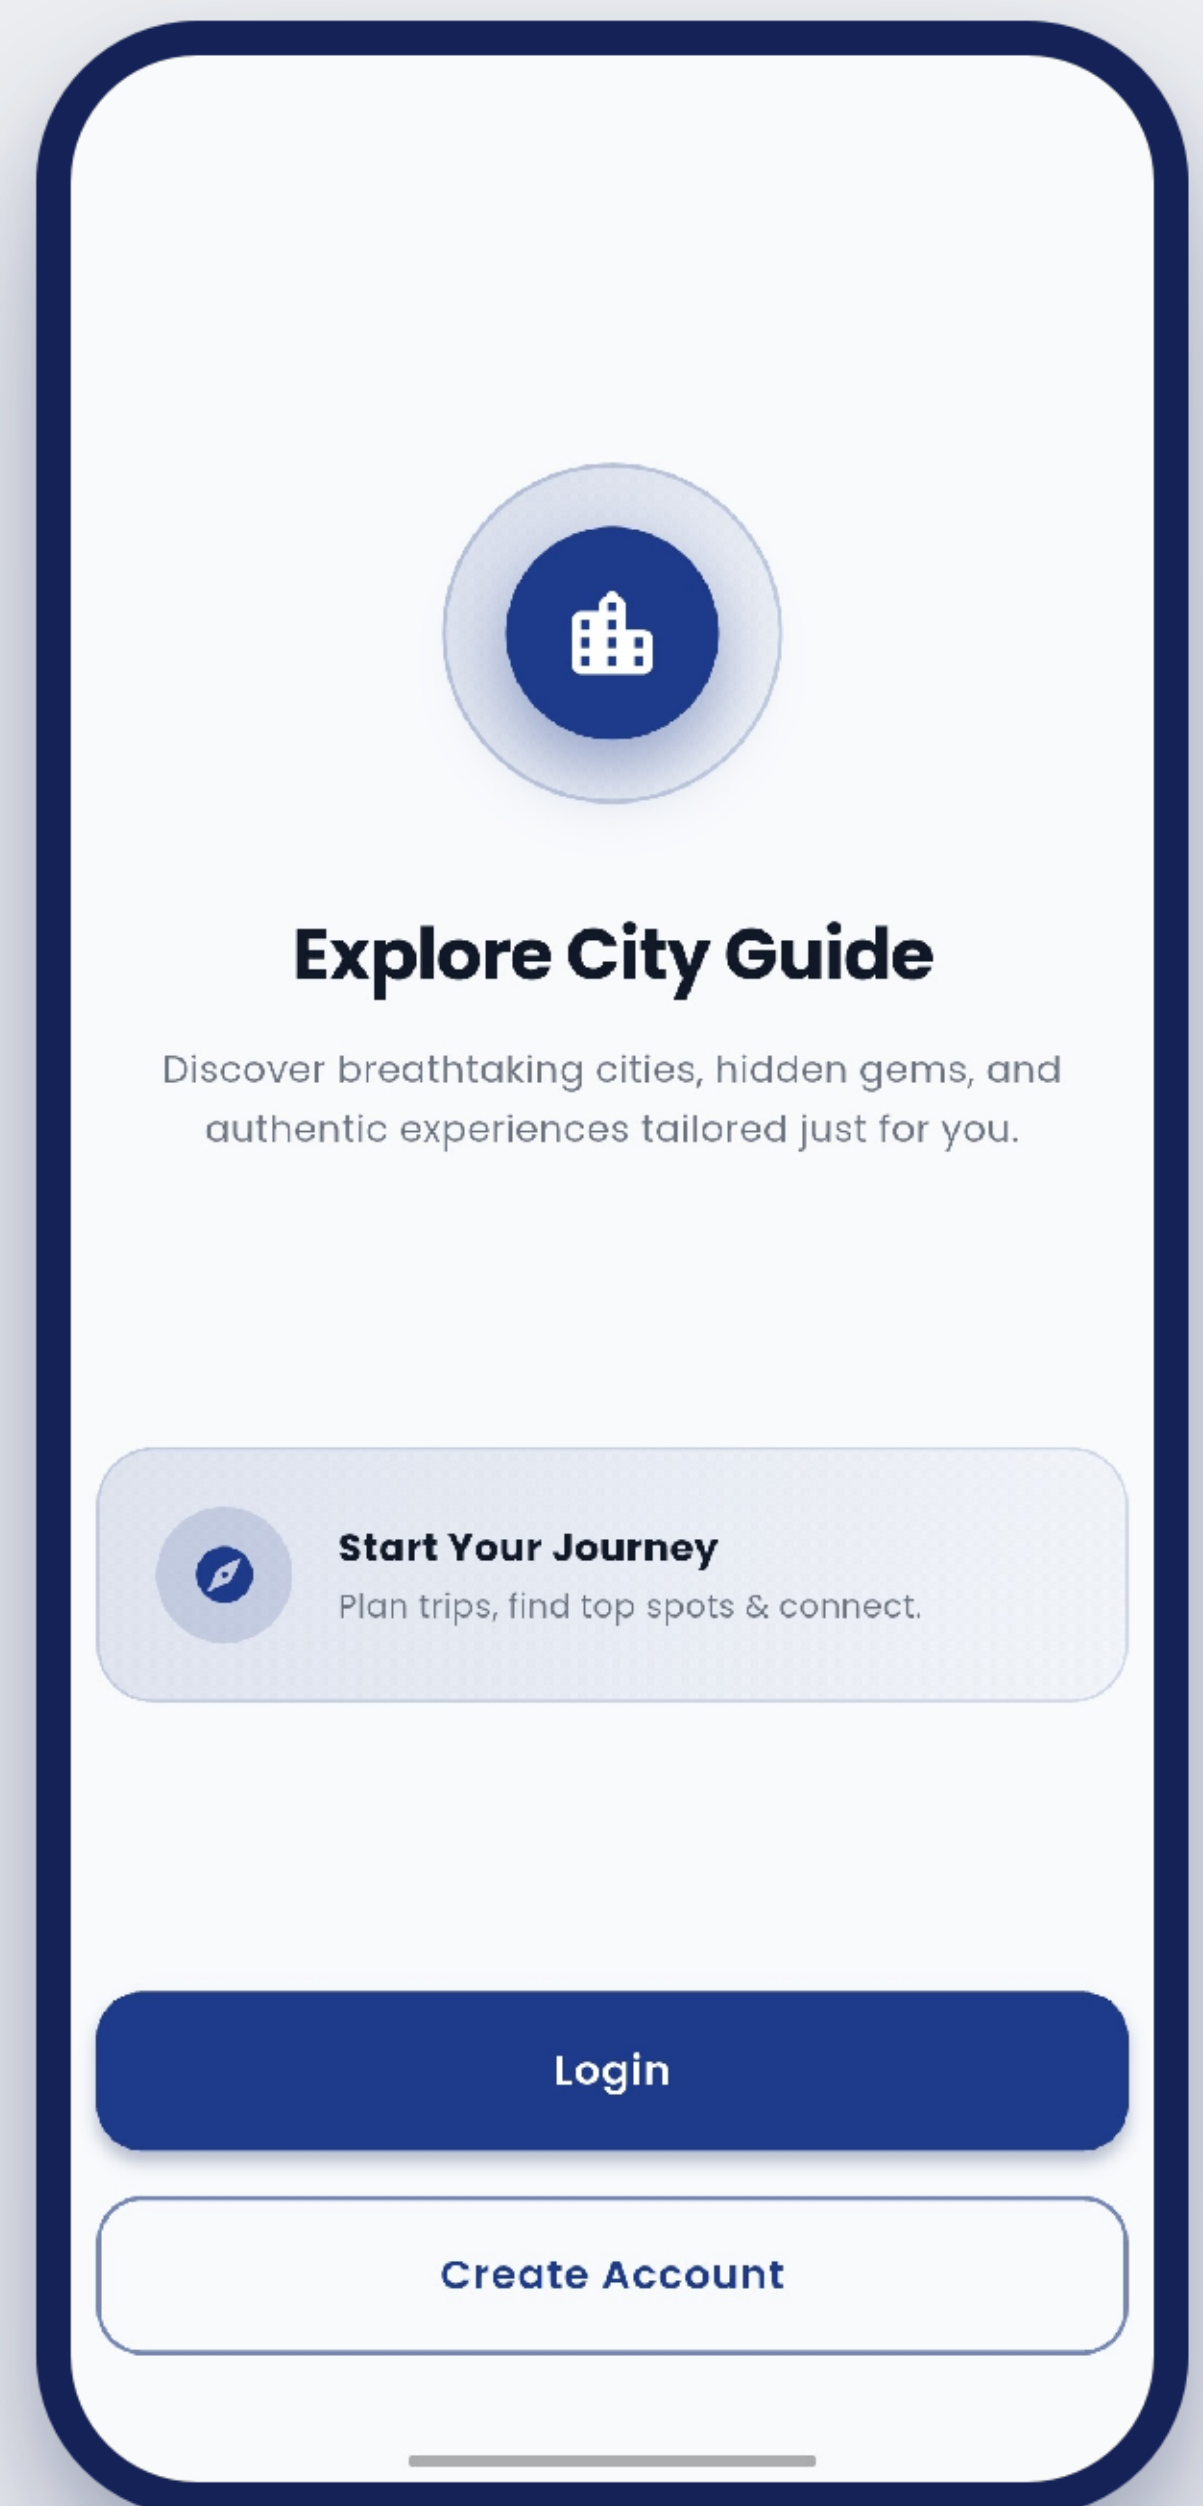

Splash Screen

A clean, minimal splash screen that opens the experience with the app's identity — simple and memorable.

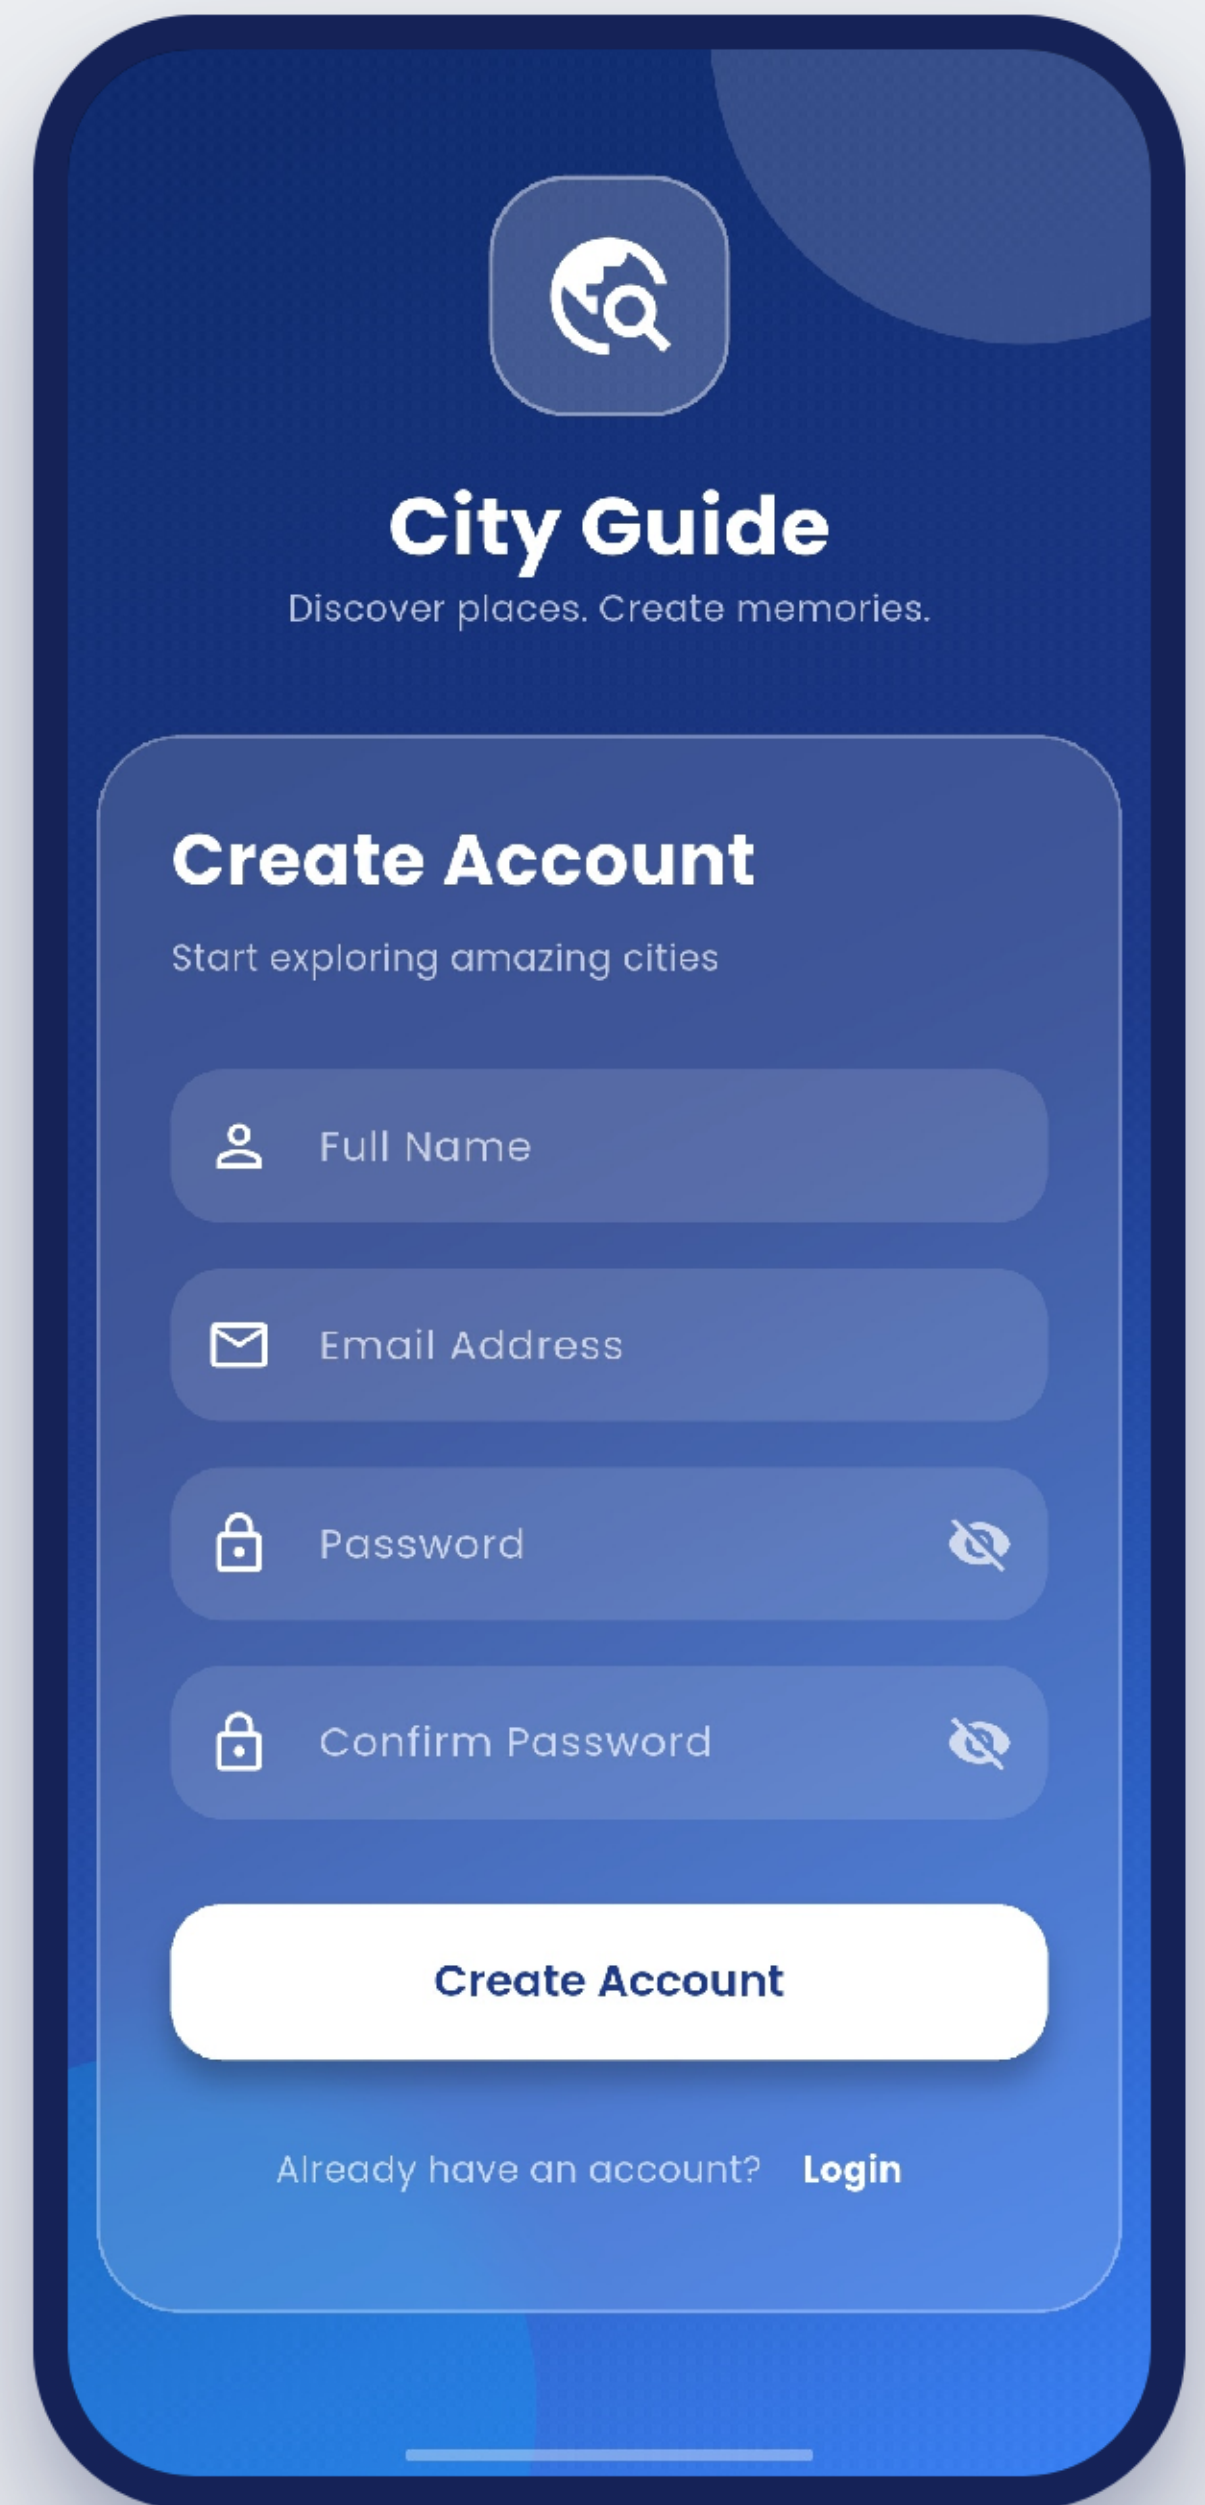

Onboarding

First impressions matter. The onboarding screen introduces the app's purpose before users log in or sign up.

Create Account

A straightforward sign-up flow — name, email, password — so users can start exploring in seconds.

**City Guide**
Discover places. Create memories.

Login Screen

Returning users are welcomed back with a quick, secure login screen.

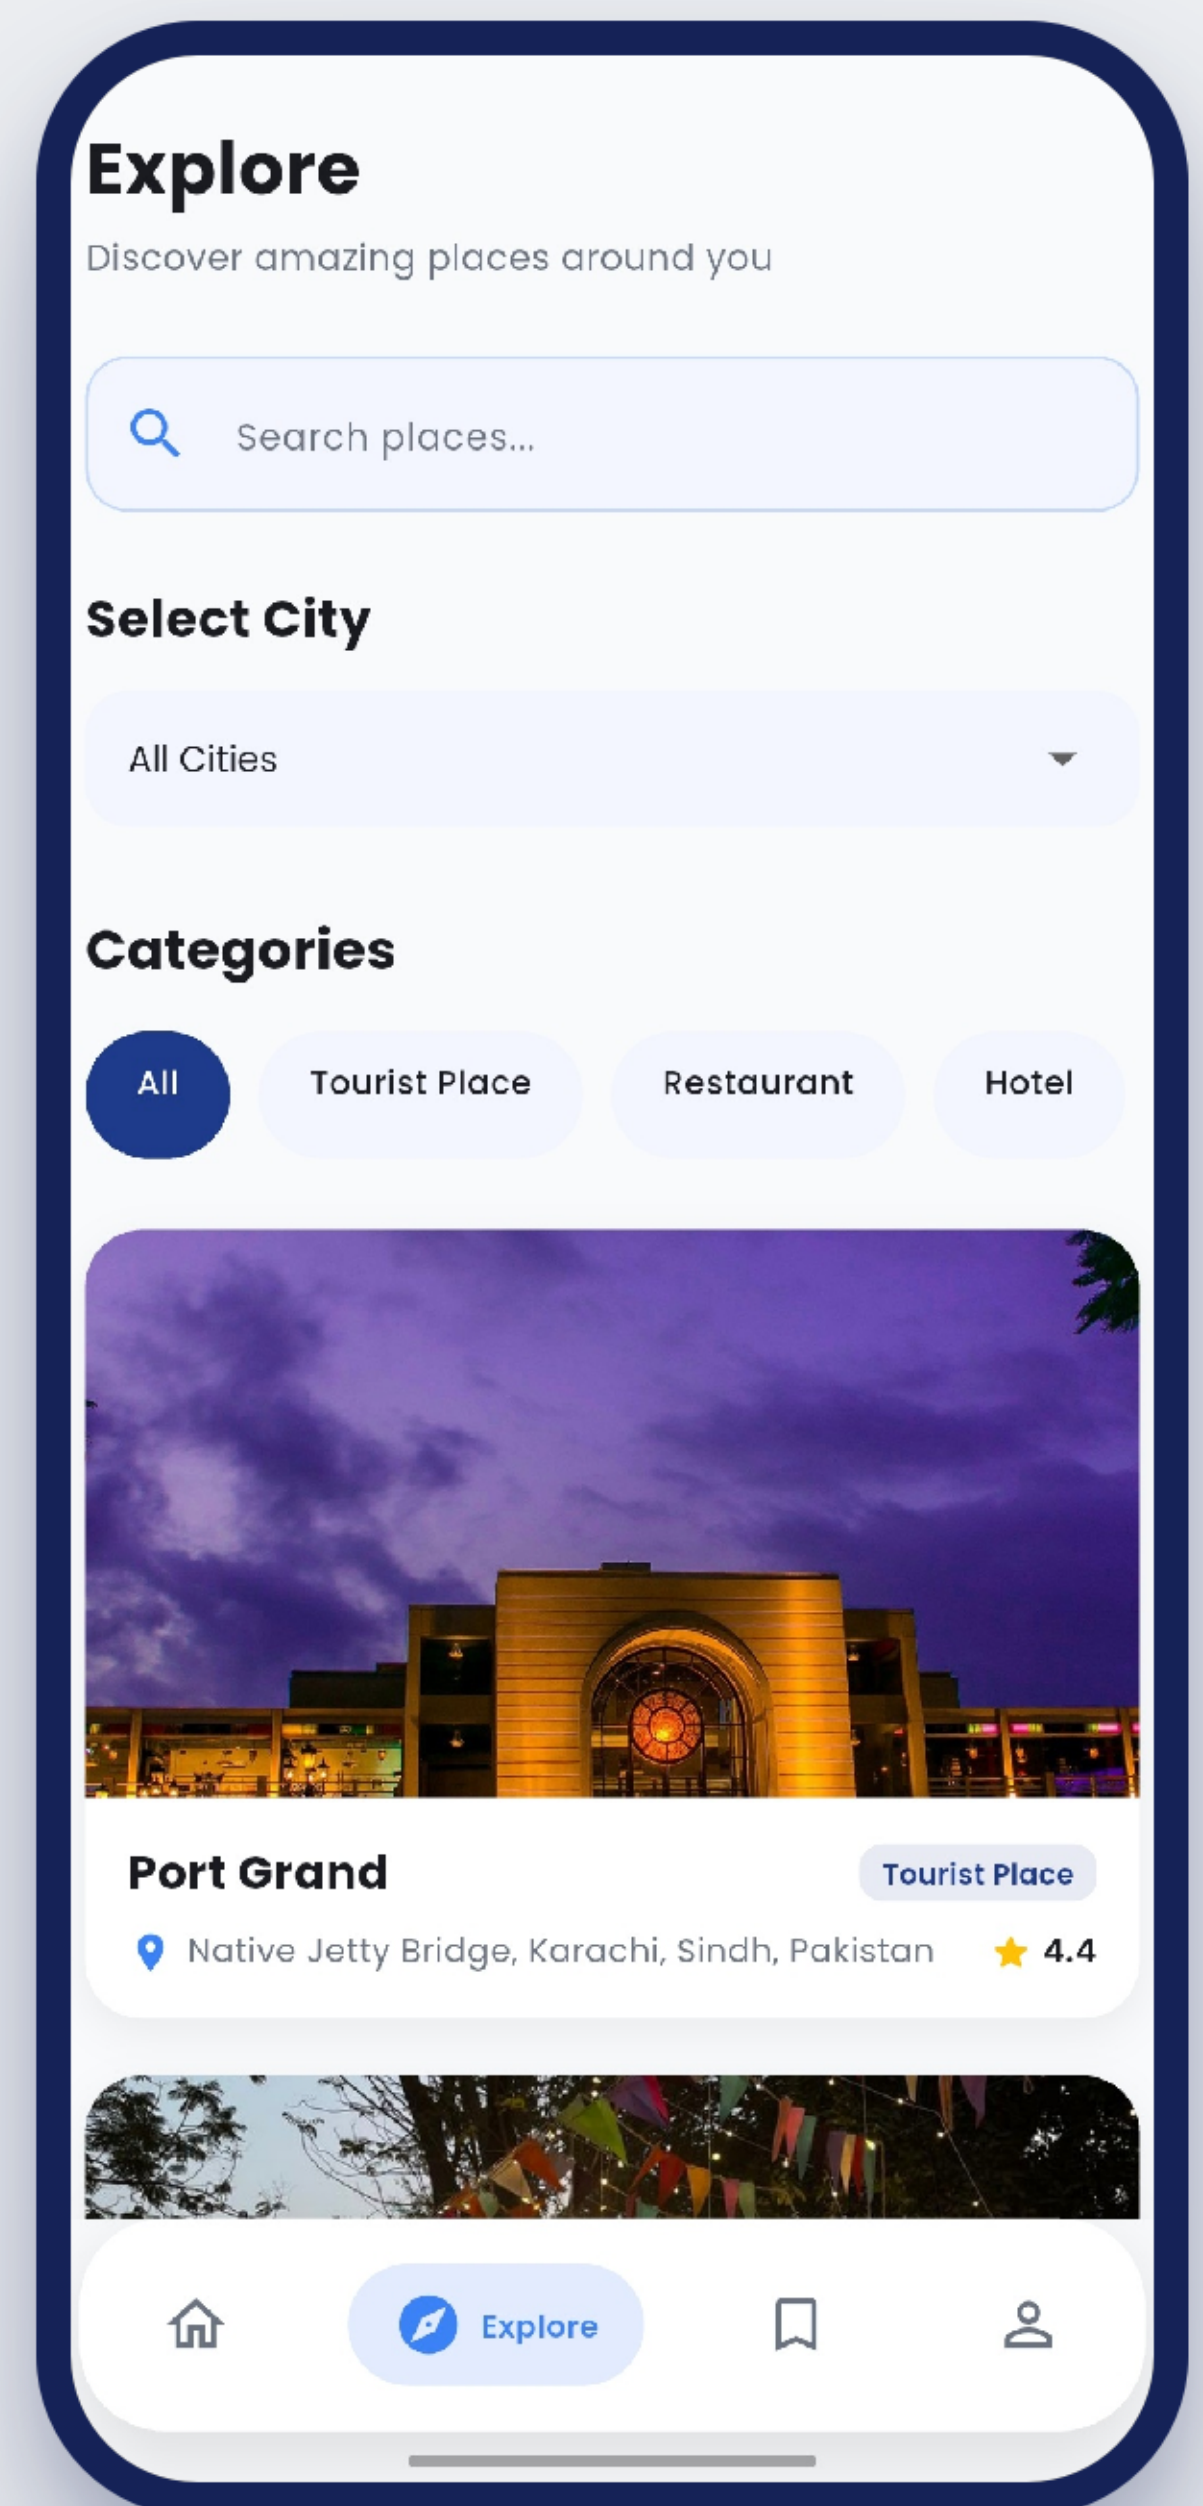

Home Screen

The home screen greets users with featured destinations, quick categories, and a clear call-to-action to start exploring.

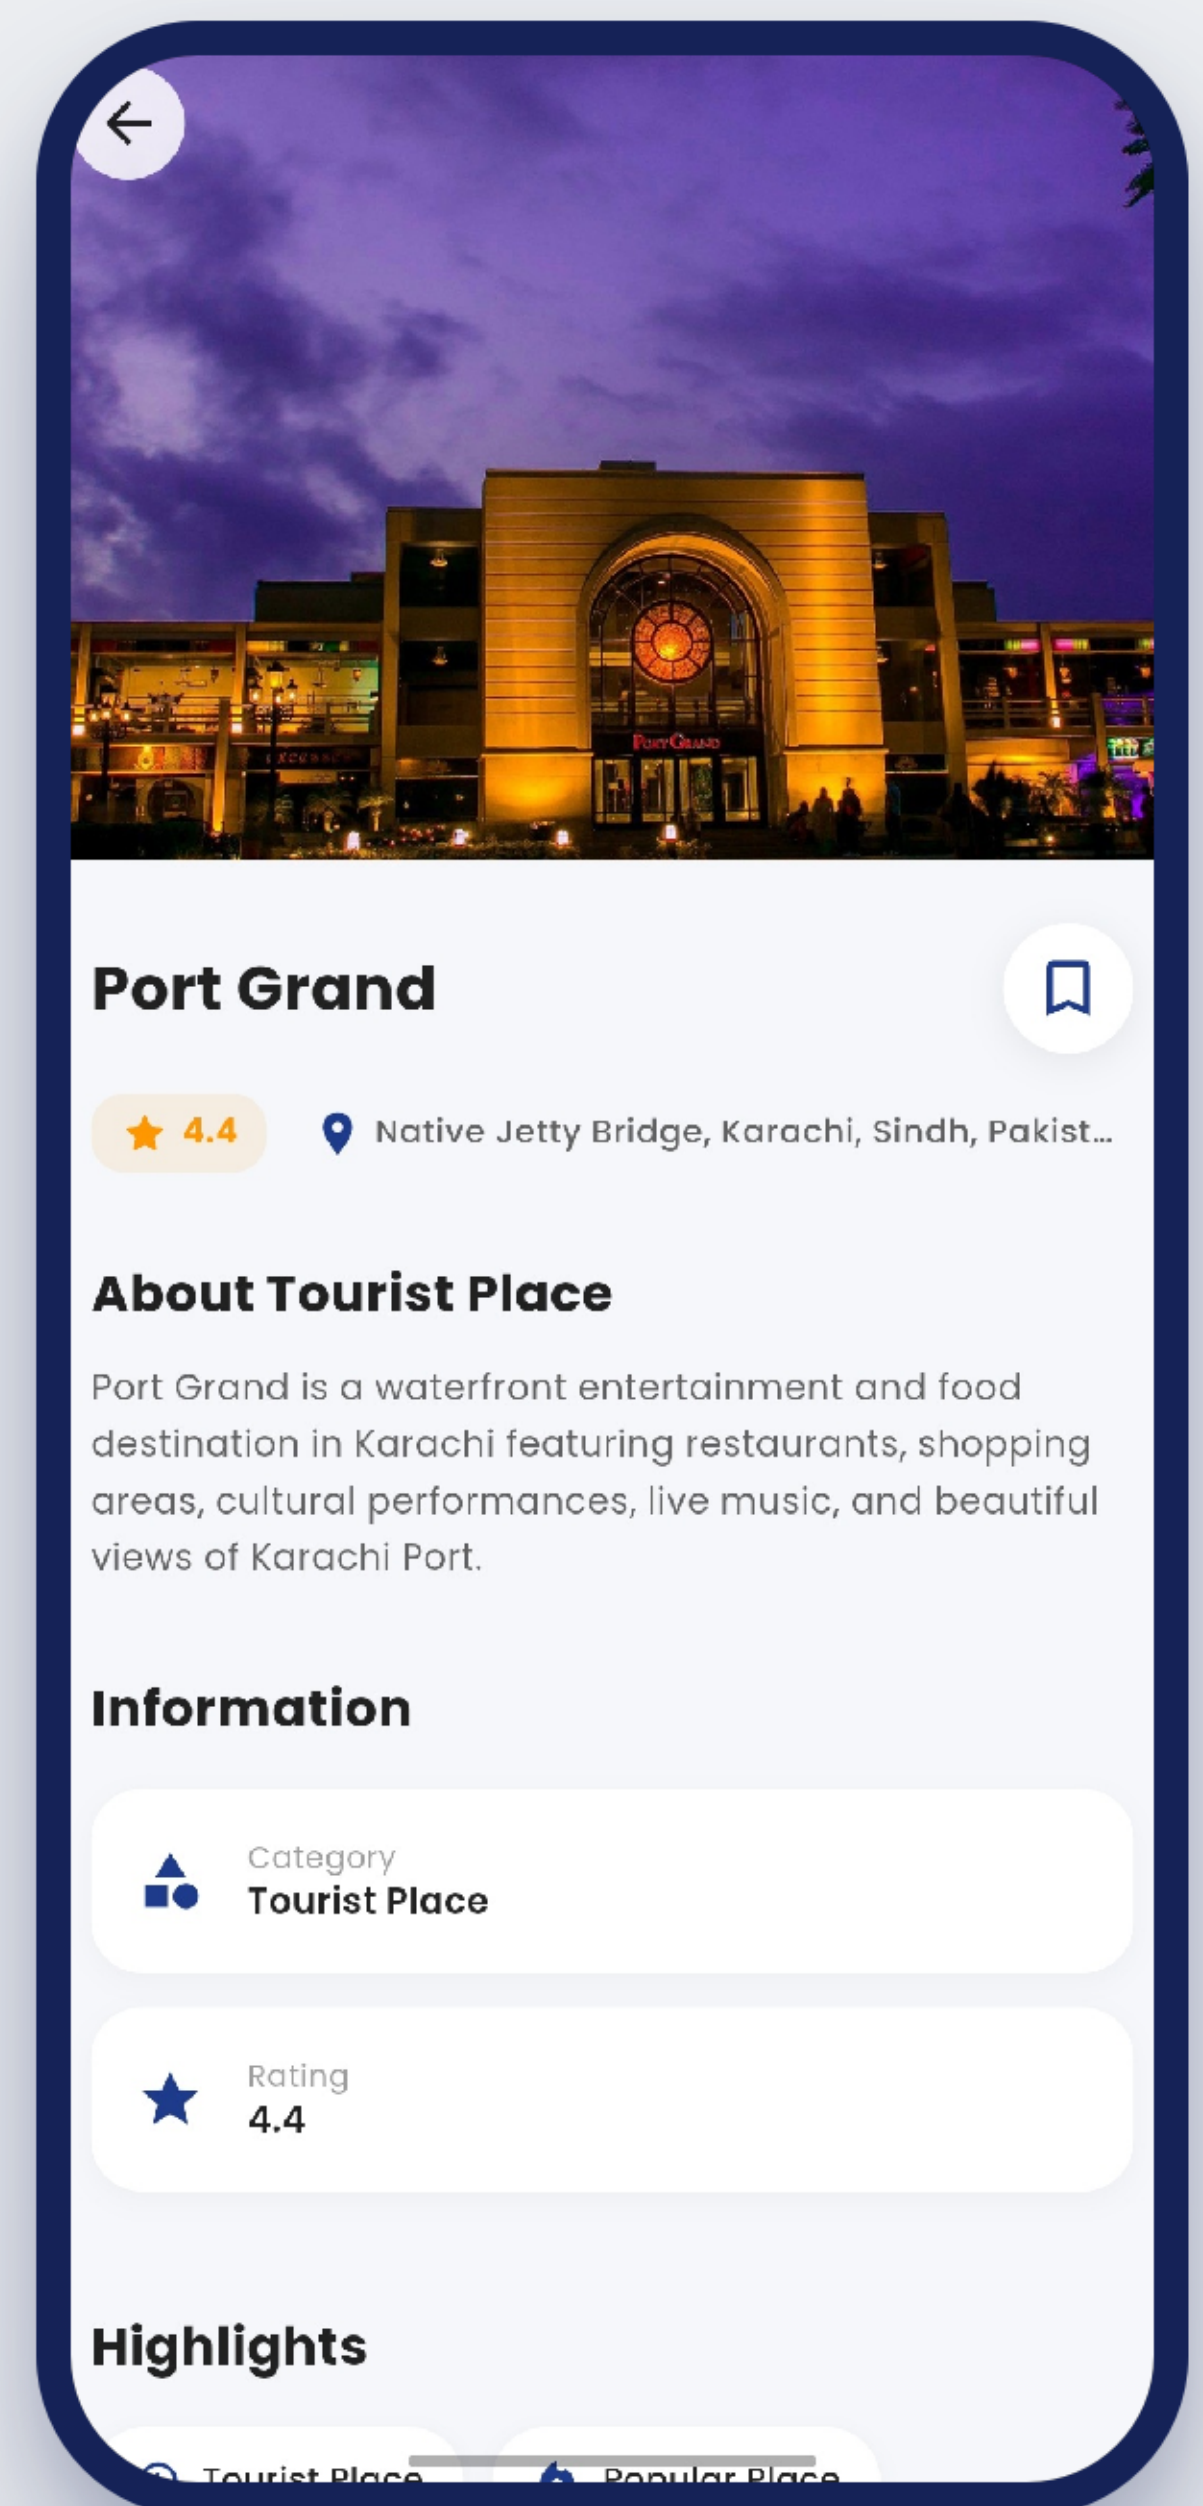

Explore Screen

Search and filter places by city and category — tourist spots, restaurants, hotels — all in one clean view.

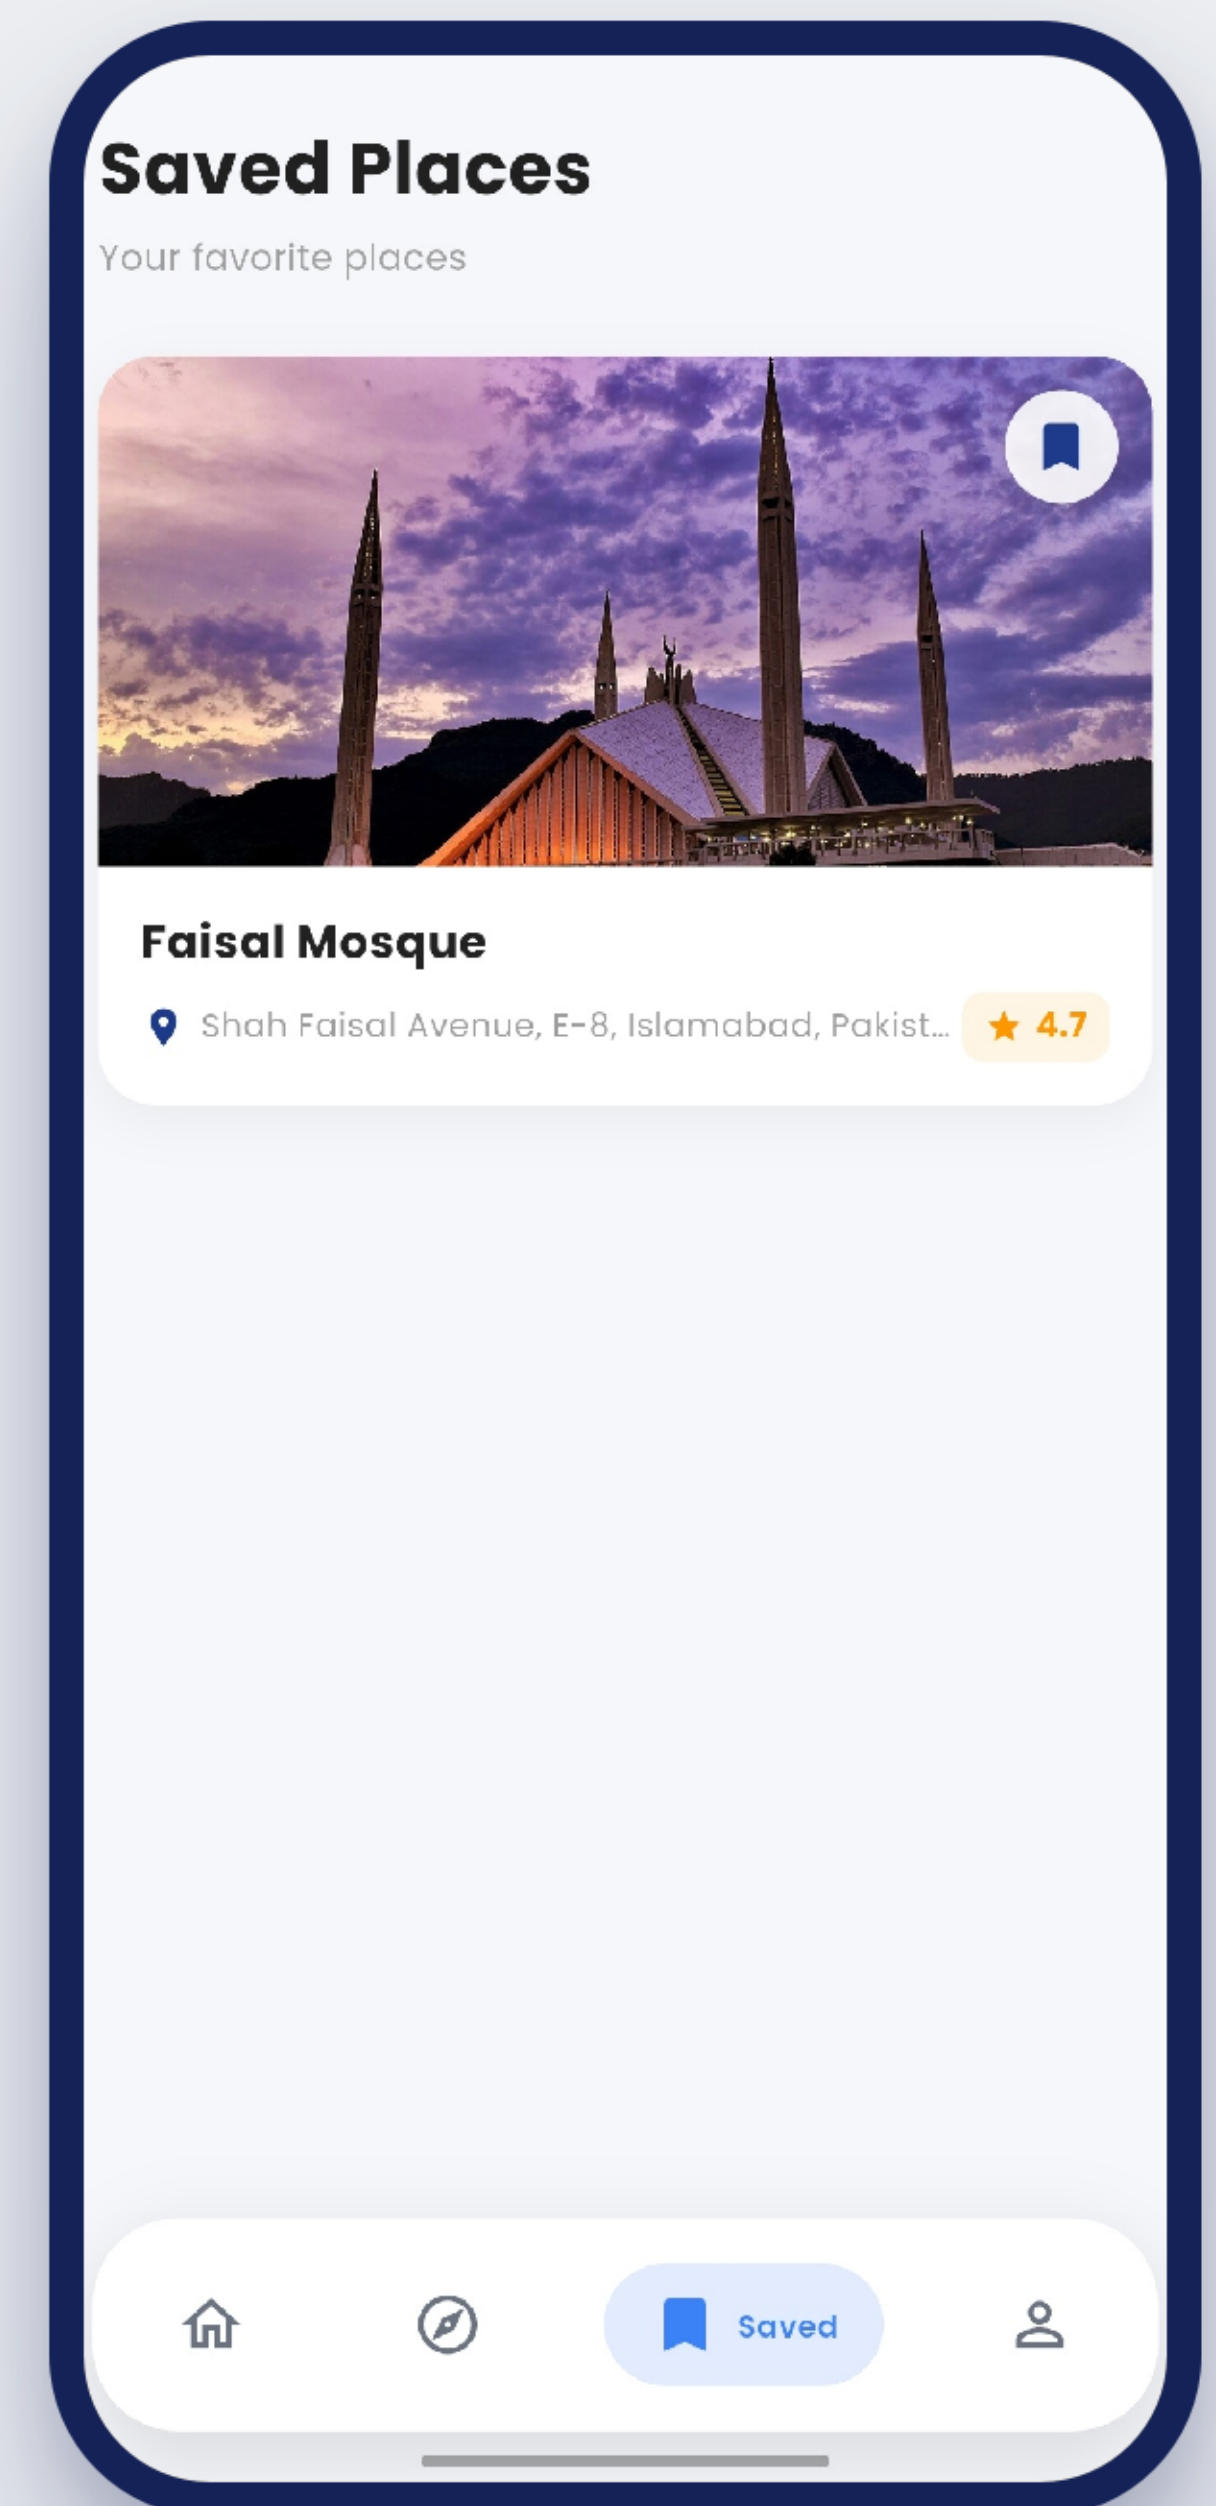

Place Details

Every place has its own detail page — ratings, location, description, and highlights at a glance.

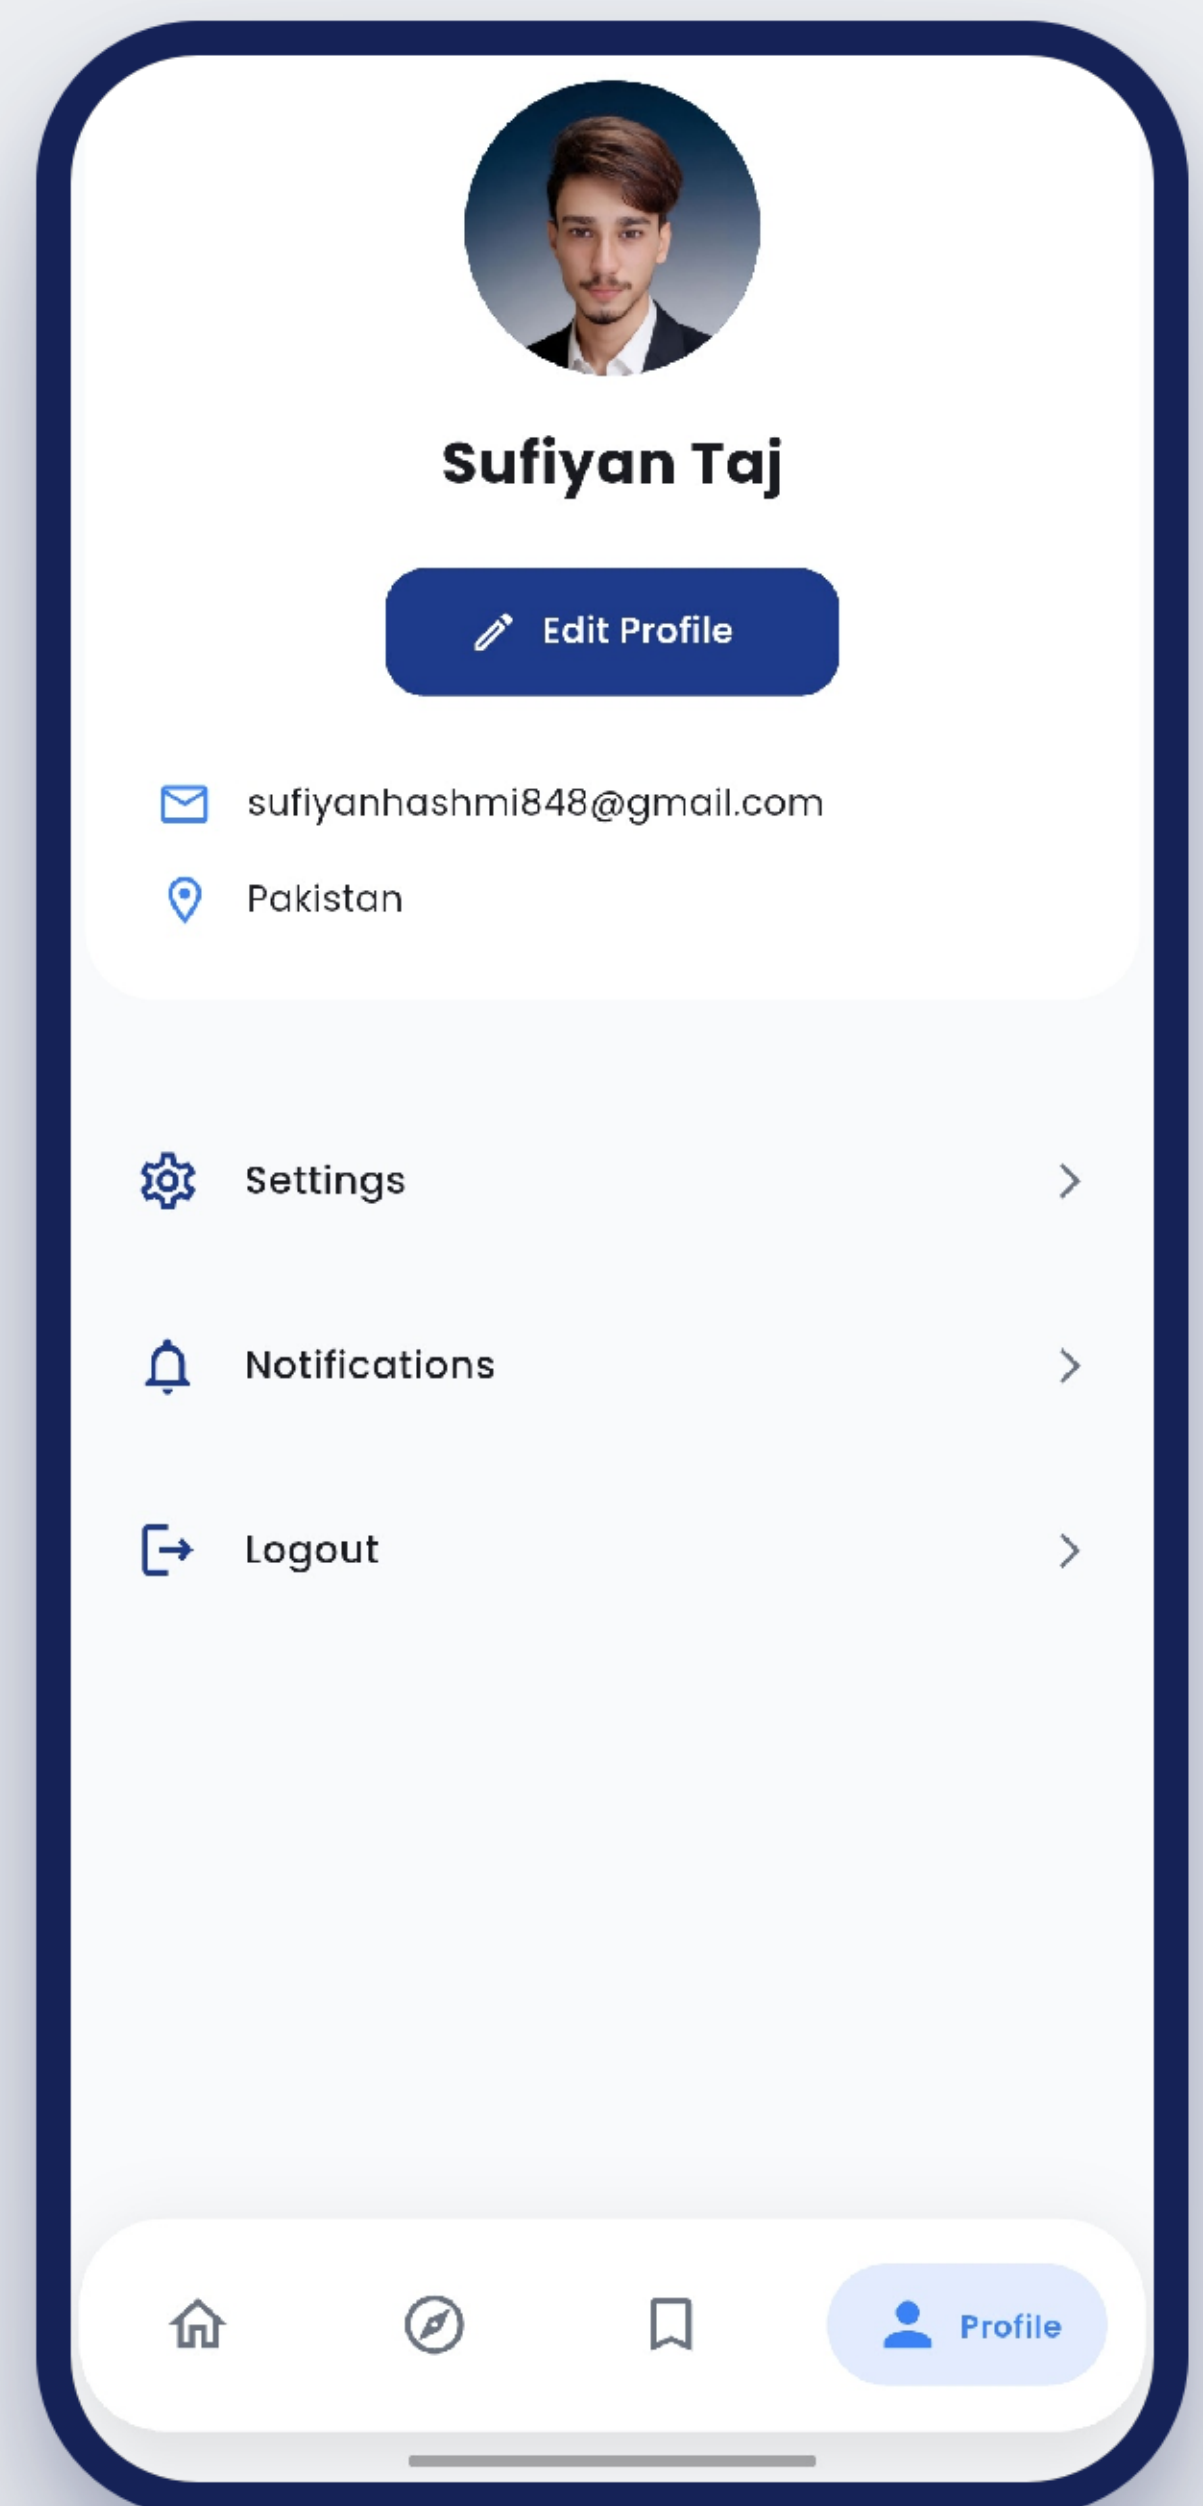

Saved Places

Users can bookmark their favorite spots and revisit them anytime from the Saved tab.

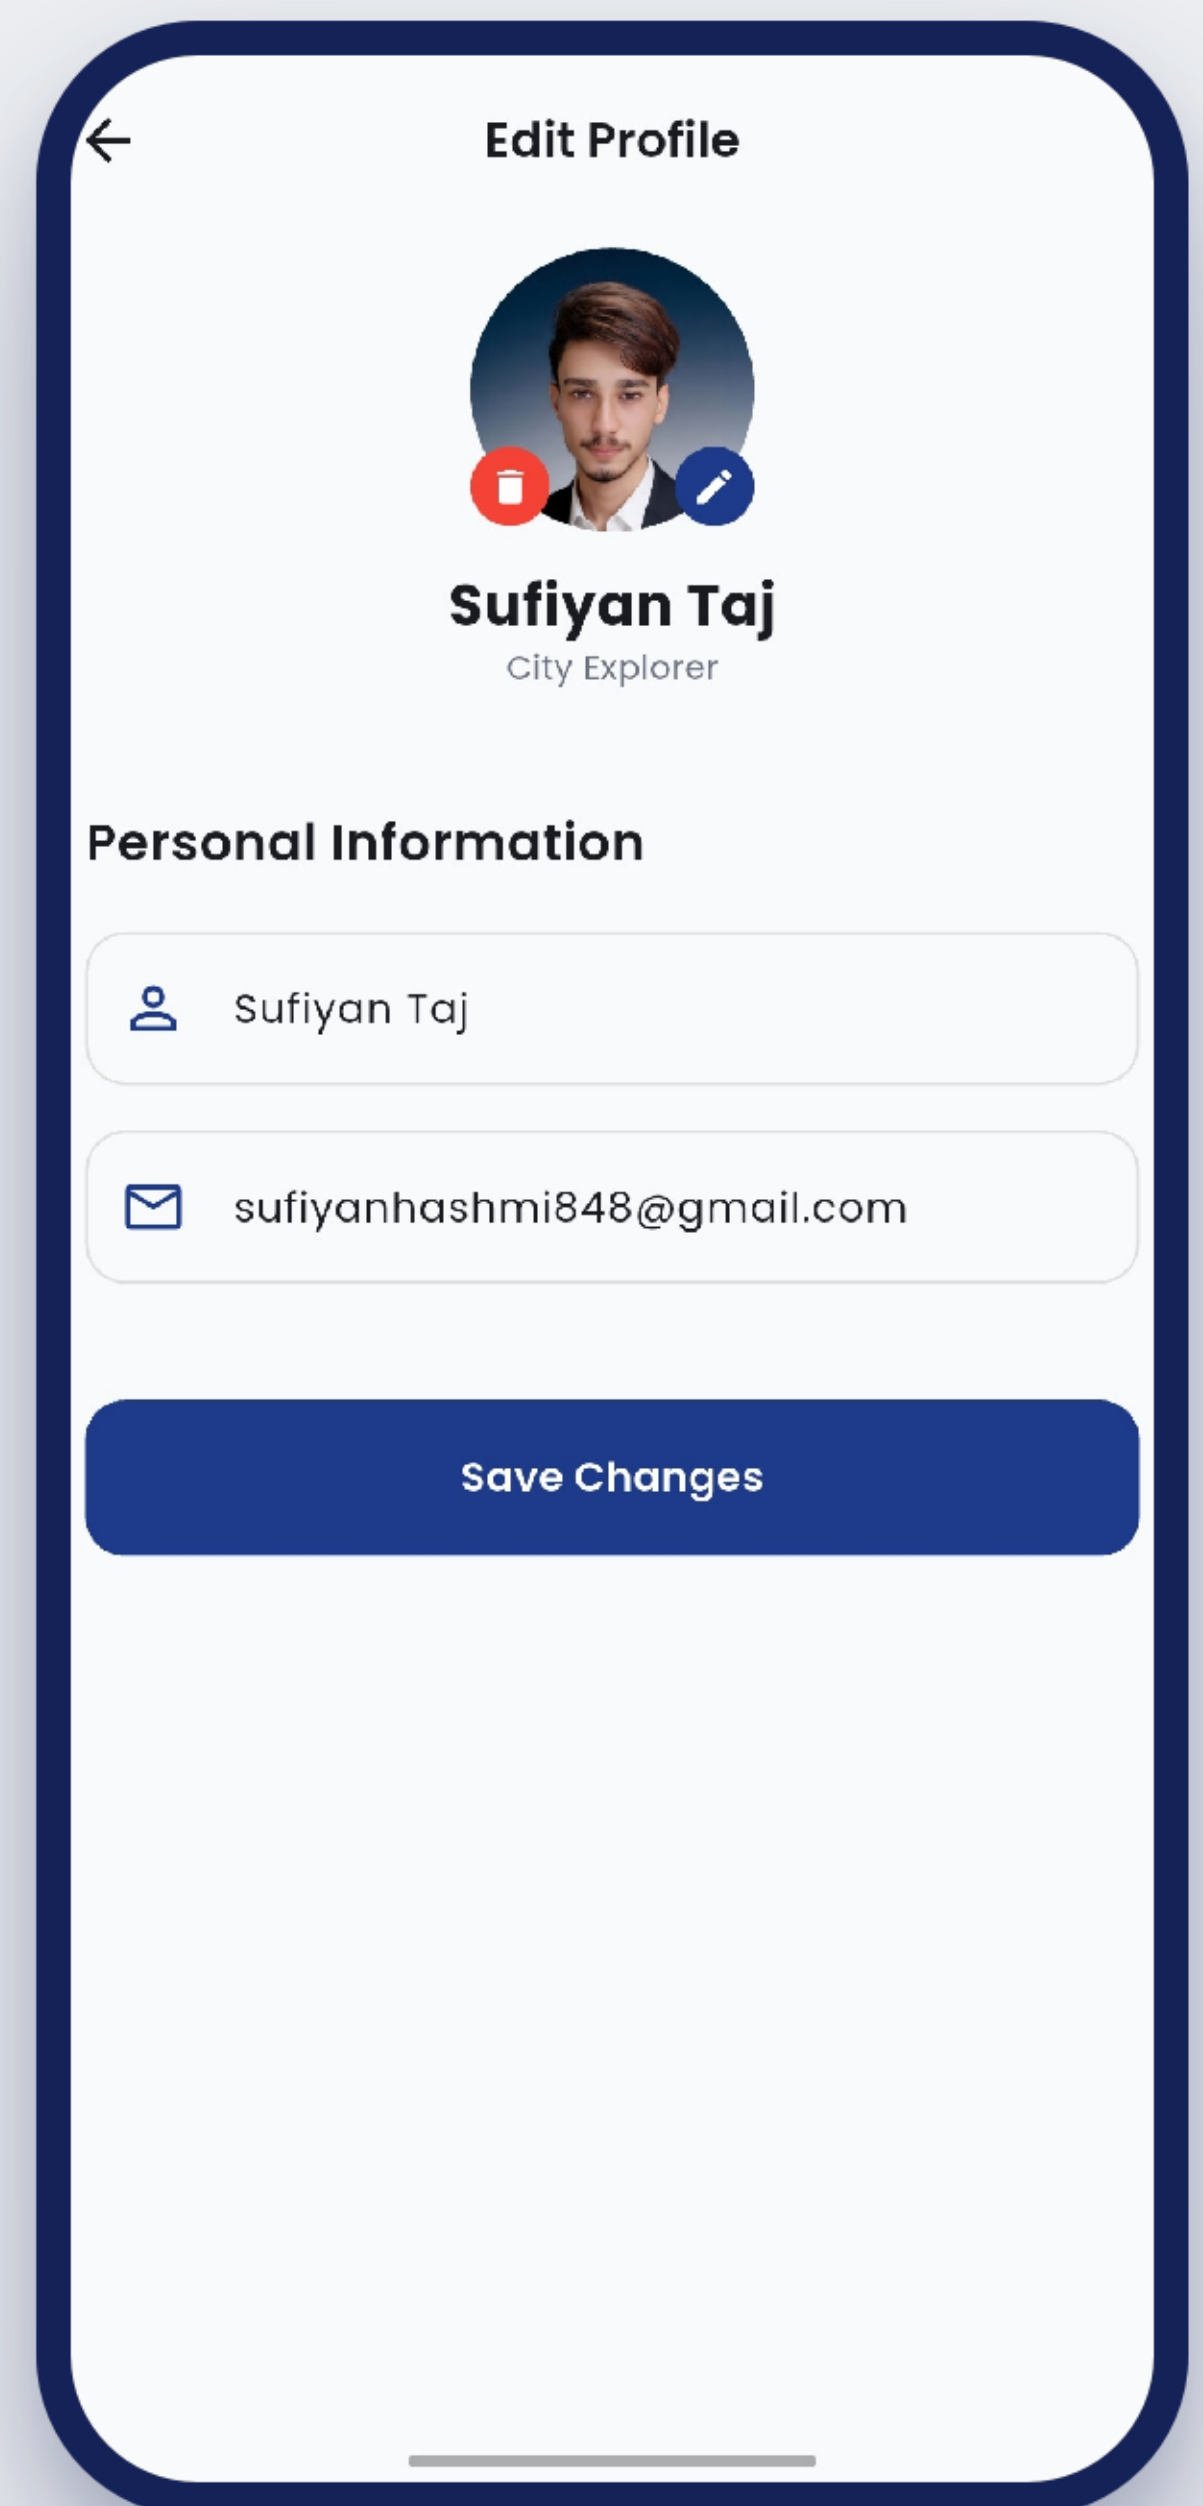

Profile Screen

A simple profile screen showing user info with quick access to settings and notifications.

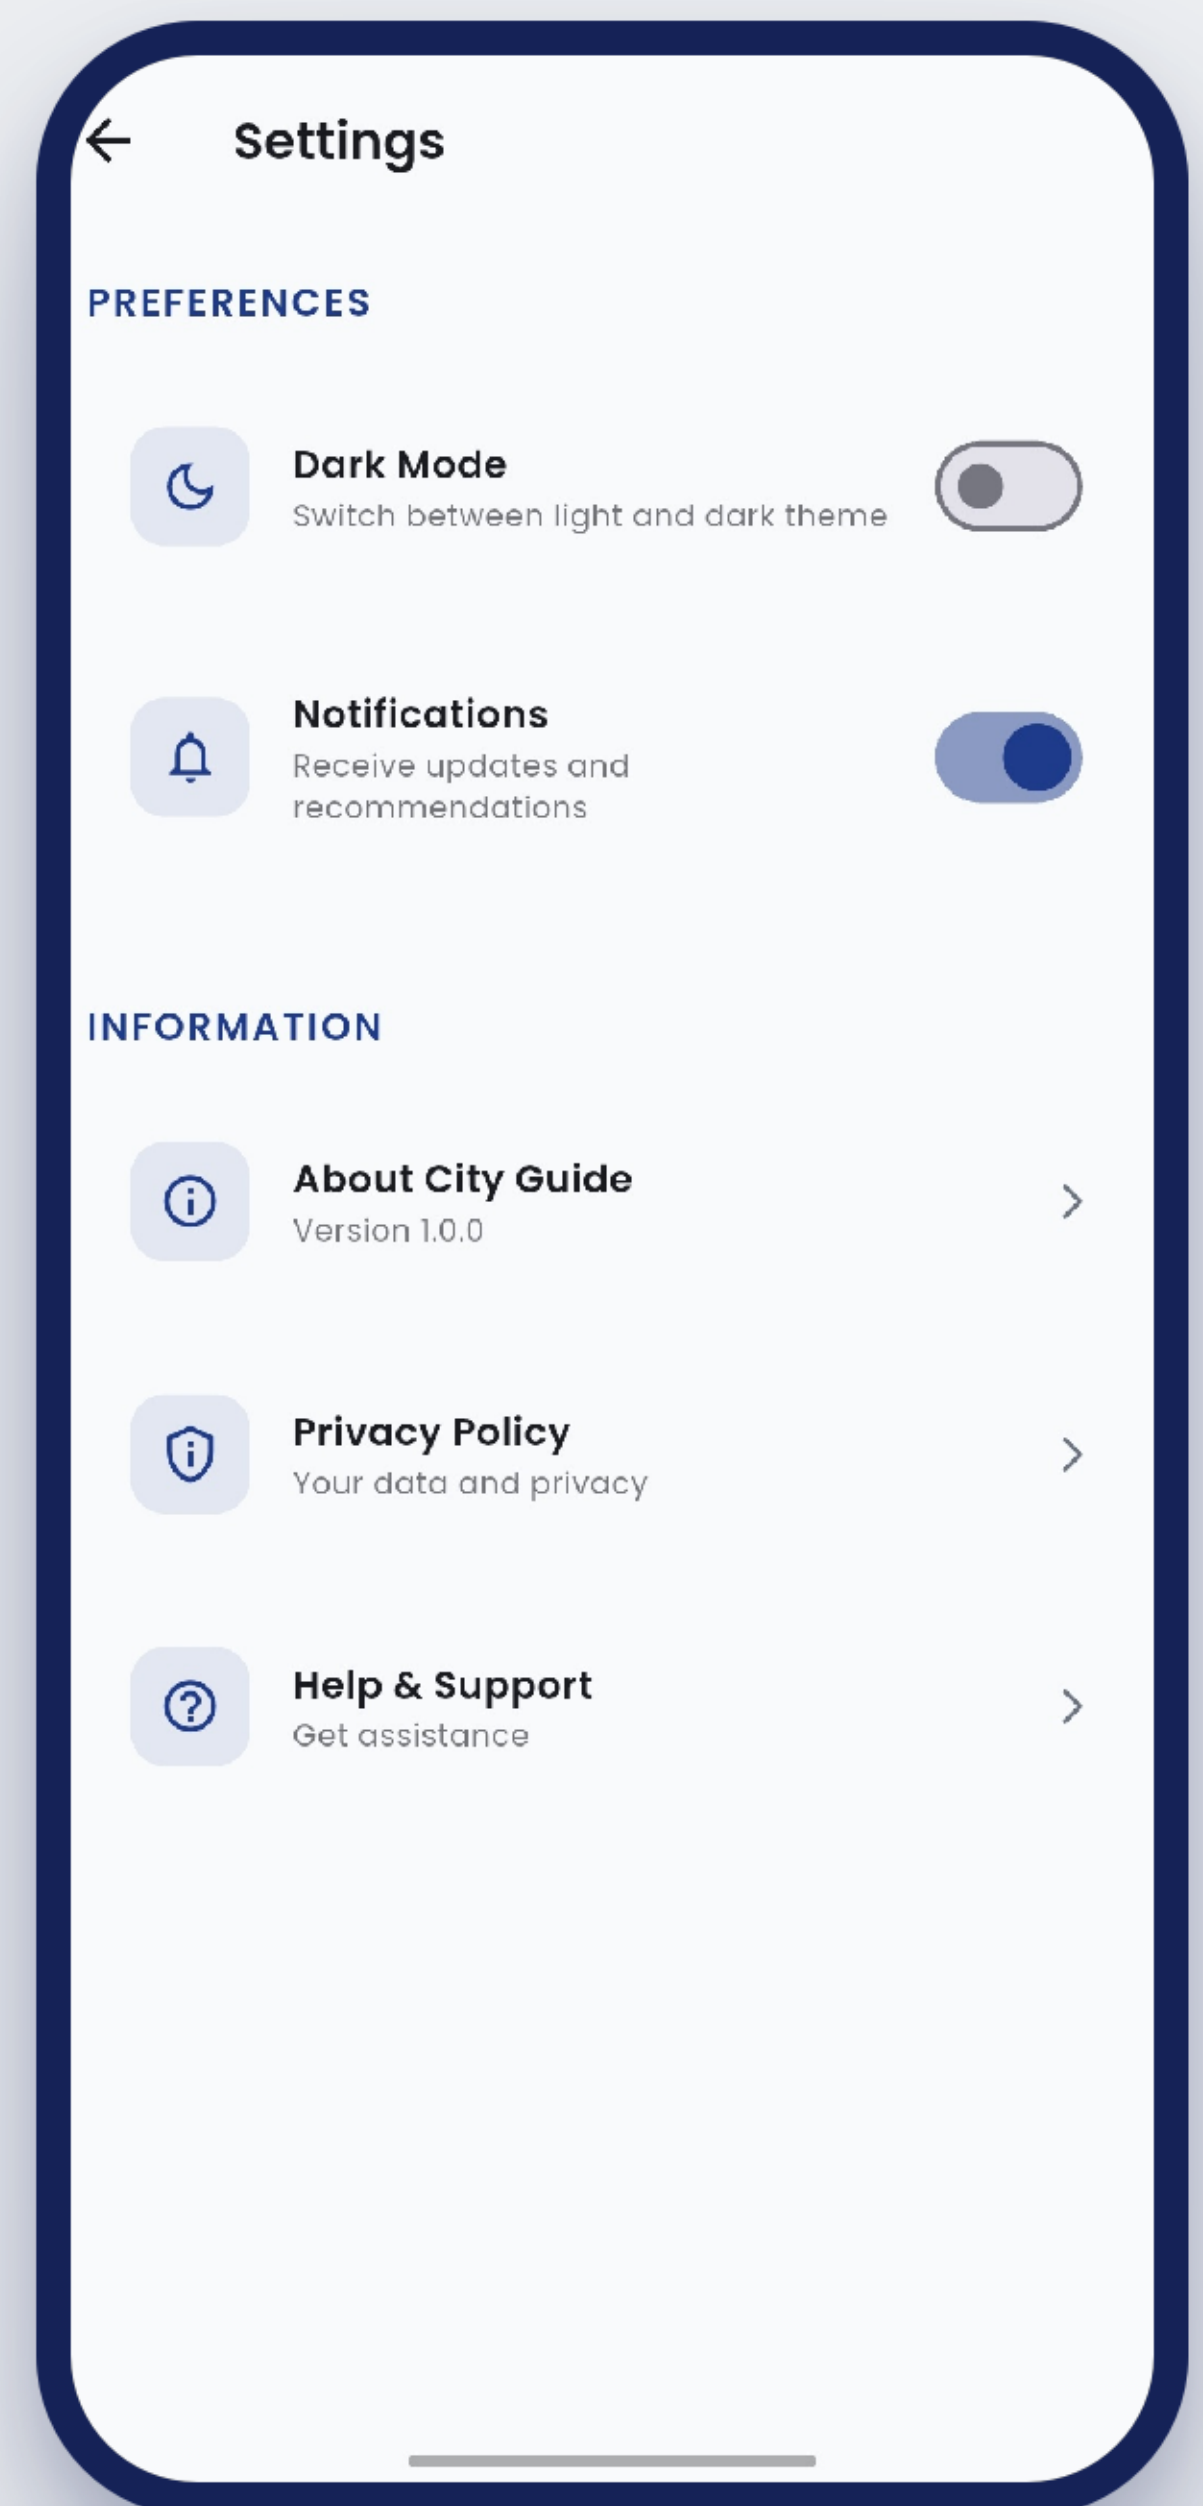

Edit Profile

Users can update their personal information anytime through a clean, focused edit-profile screen.

Settings

Dark mode, notifications, privacy & support — all core preferences organized in one place.

Powering it all: *The Admin Panel*

Behind every great app is a powerful control system. The City Guide ships with a full admin panel to manage cities, places, users, and reviews — all from one dashboard.

 Real-time dashboard analytics

 Manage cities & places

 User account control

 Review moderation

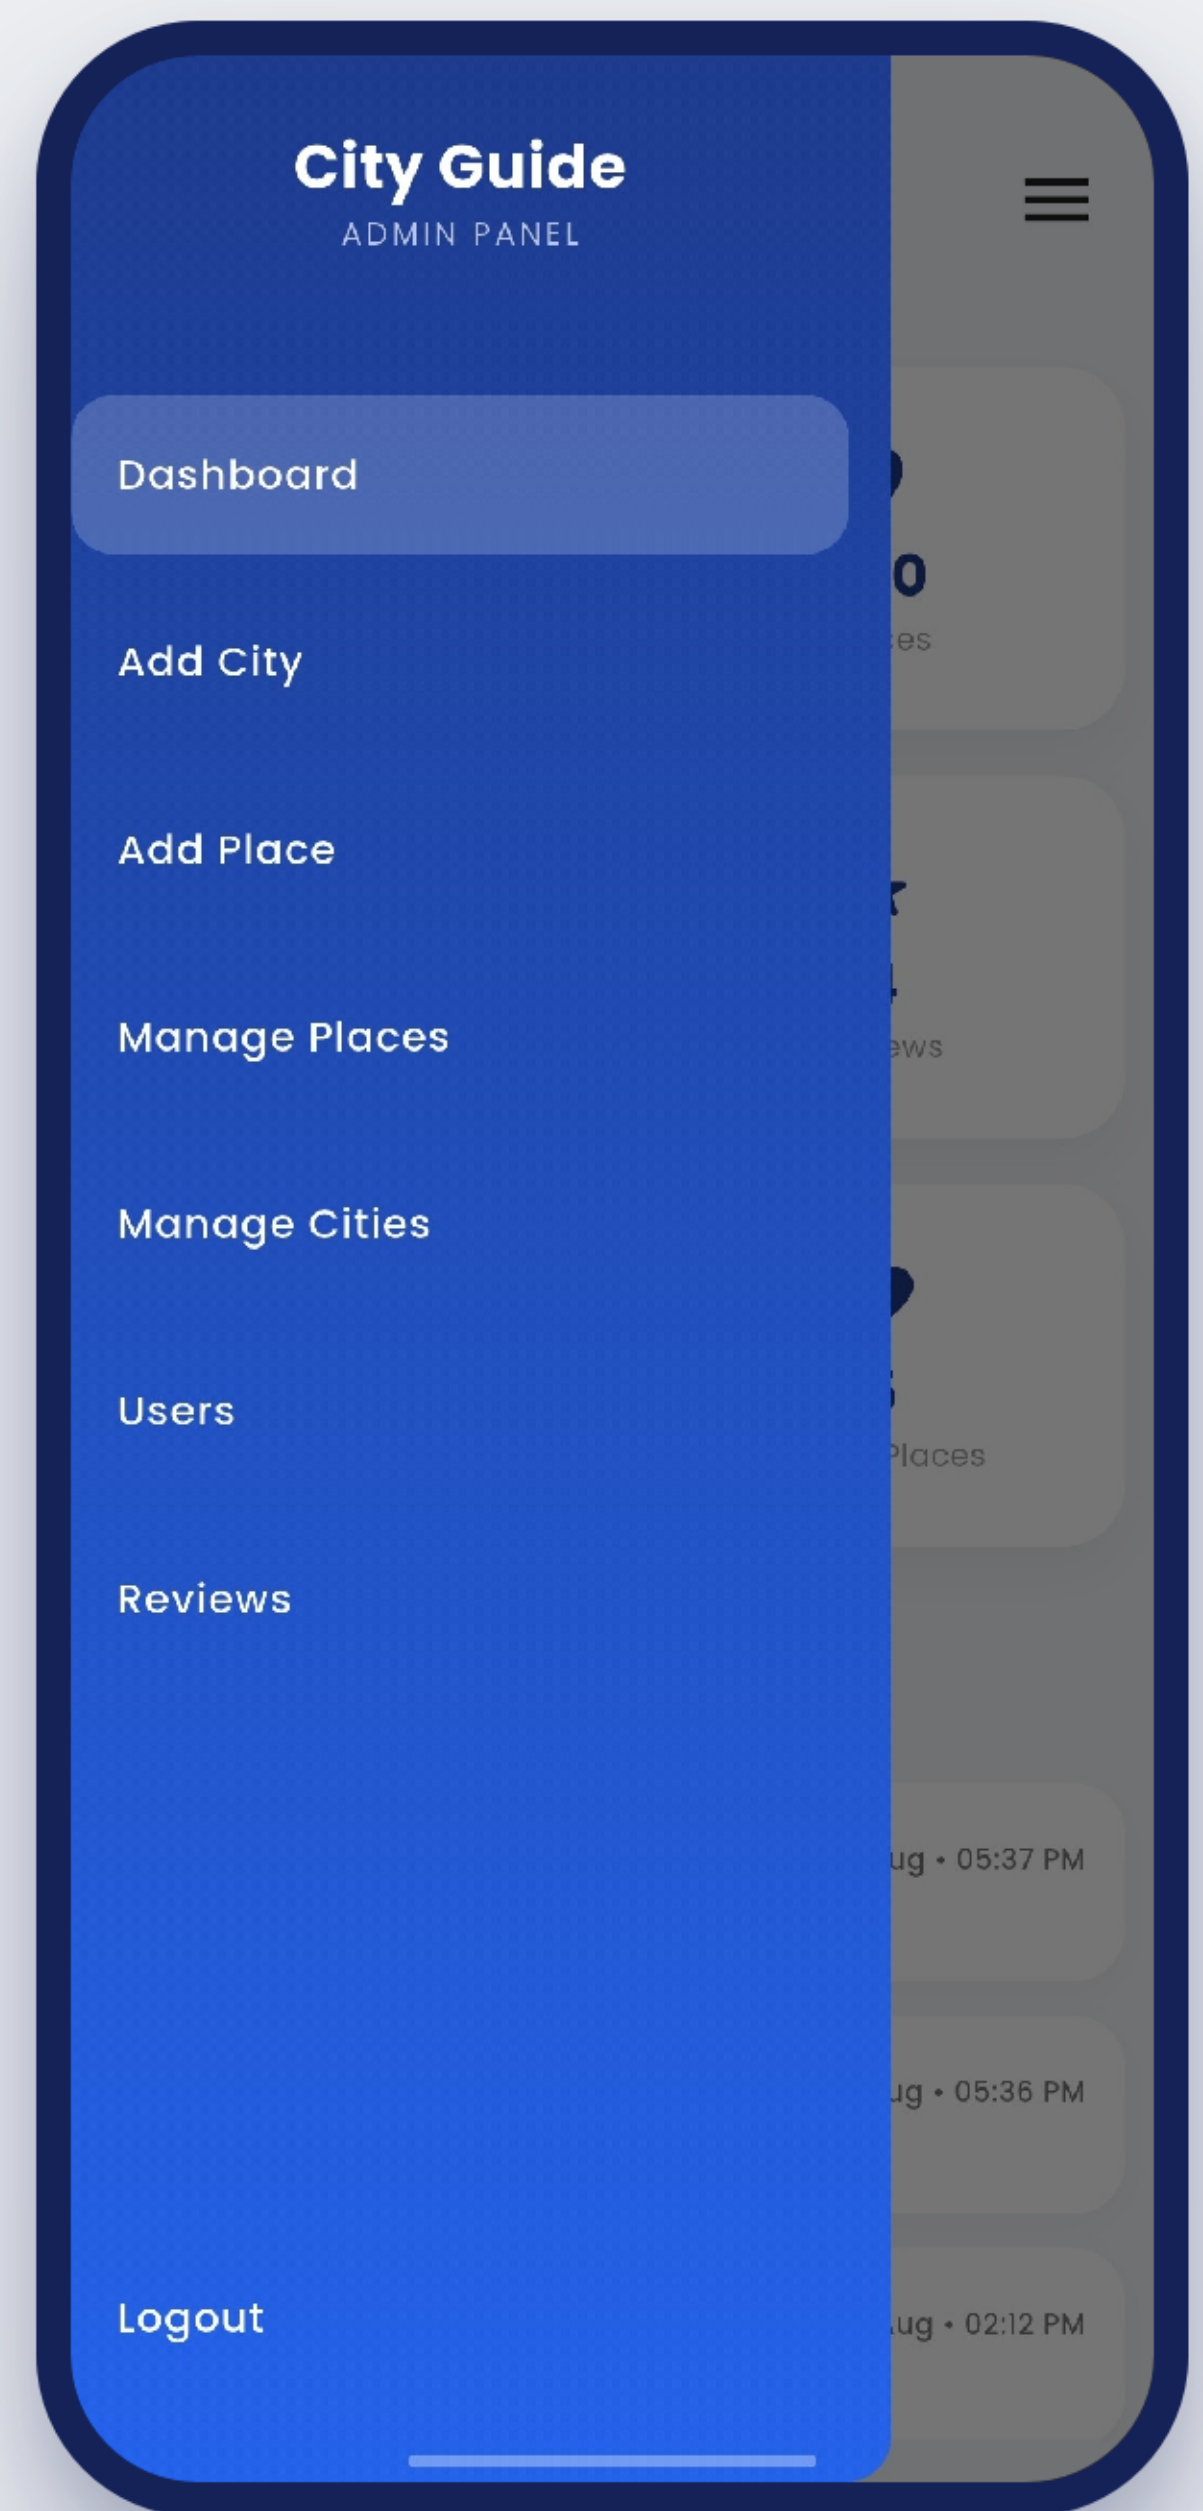

Control Panel

A real-time overview of the platform — total cities, places, users, reviews, and recent activity at a glance.

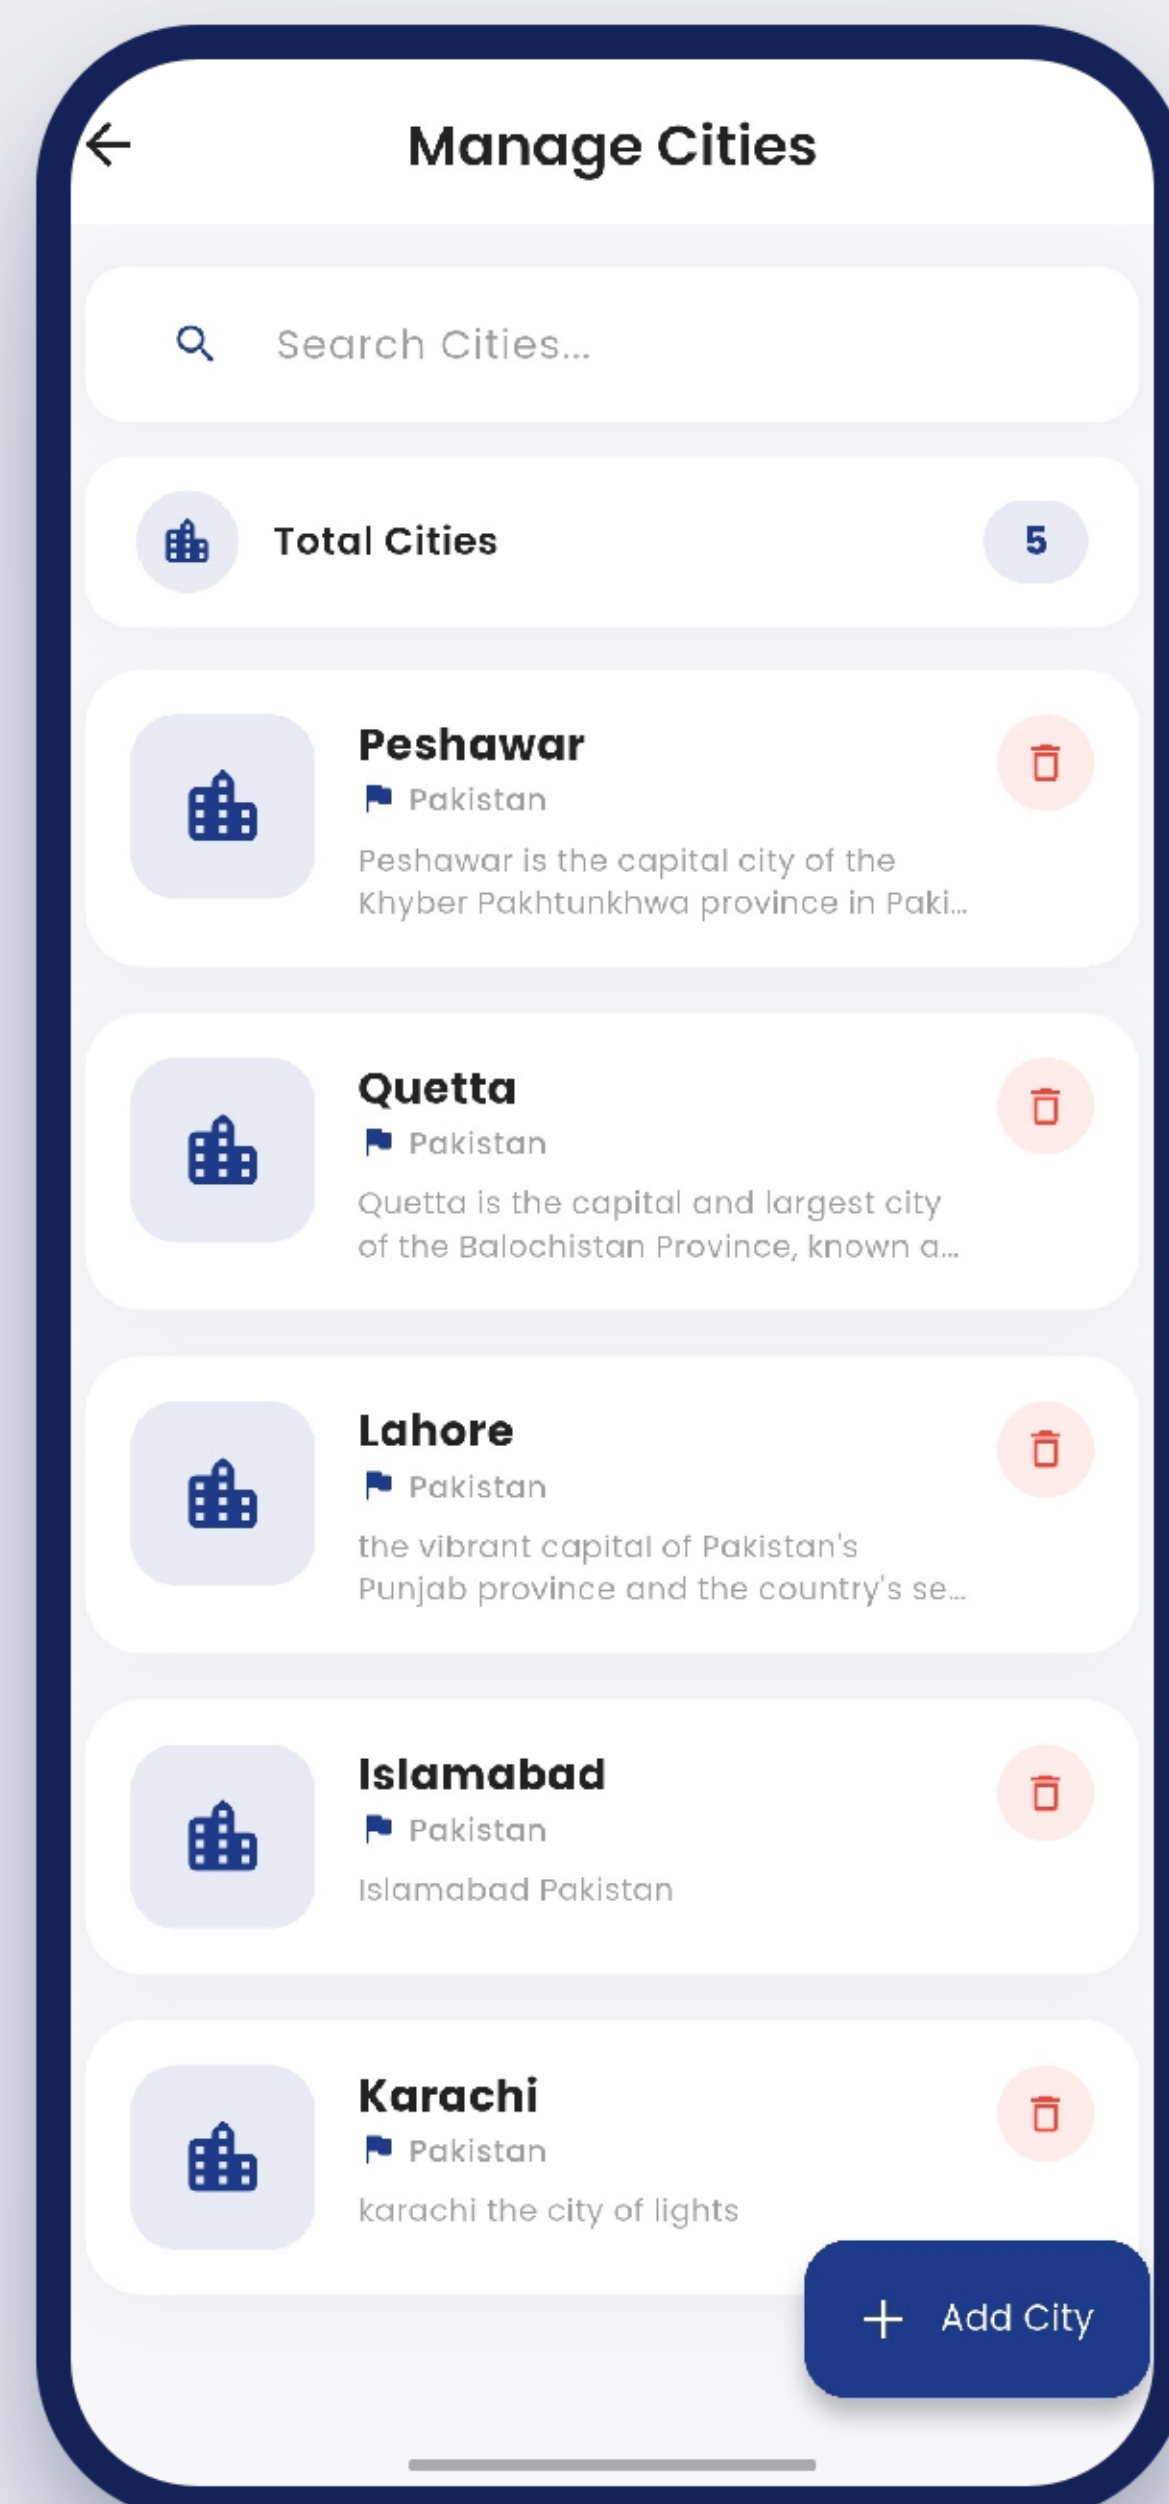

Admin Navigation

Quick access to every admin tool — dashboard, cities, places, users, and reviews — from one slide-out menu.

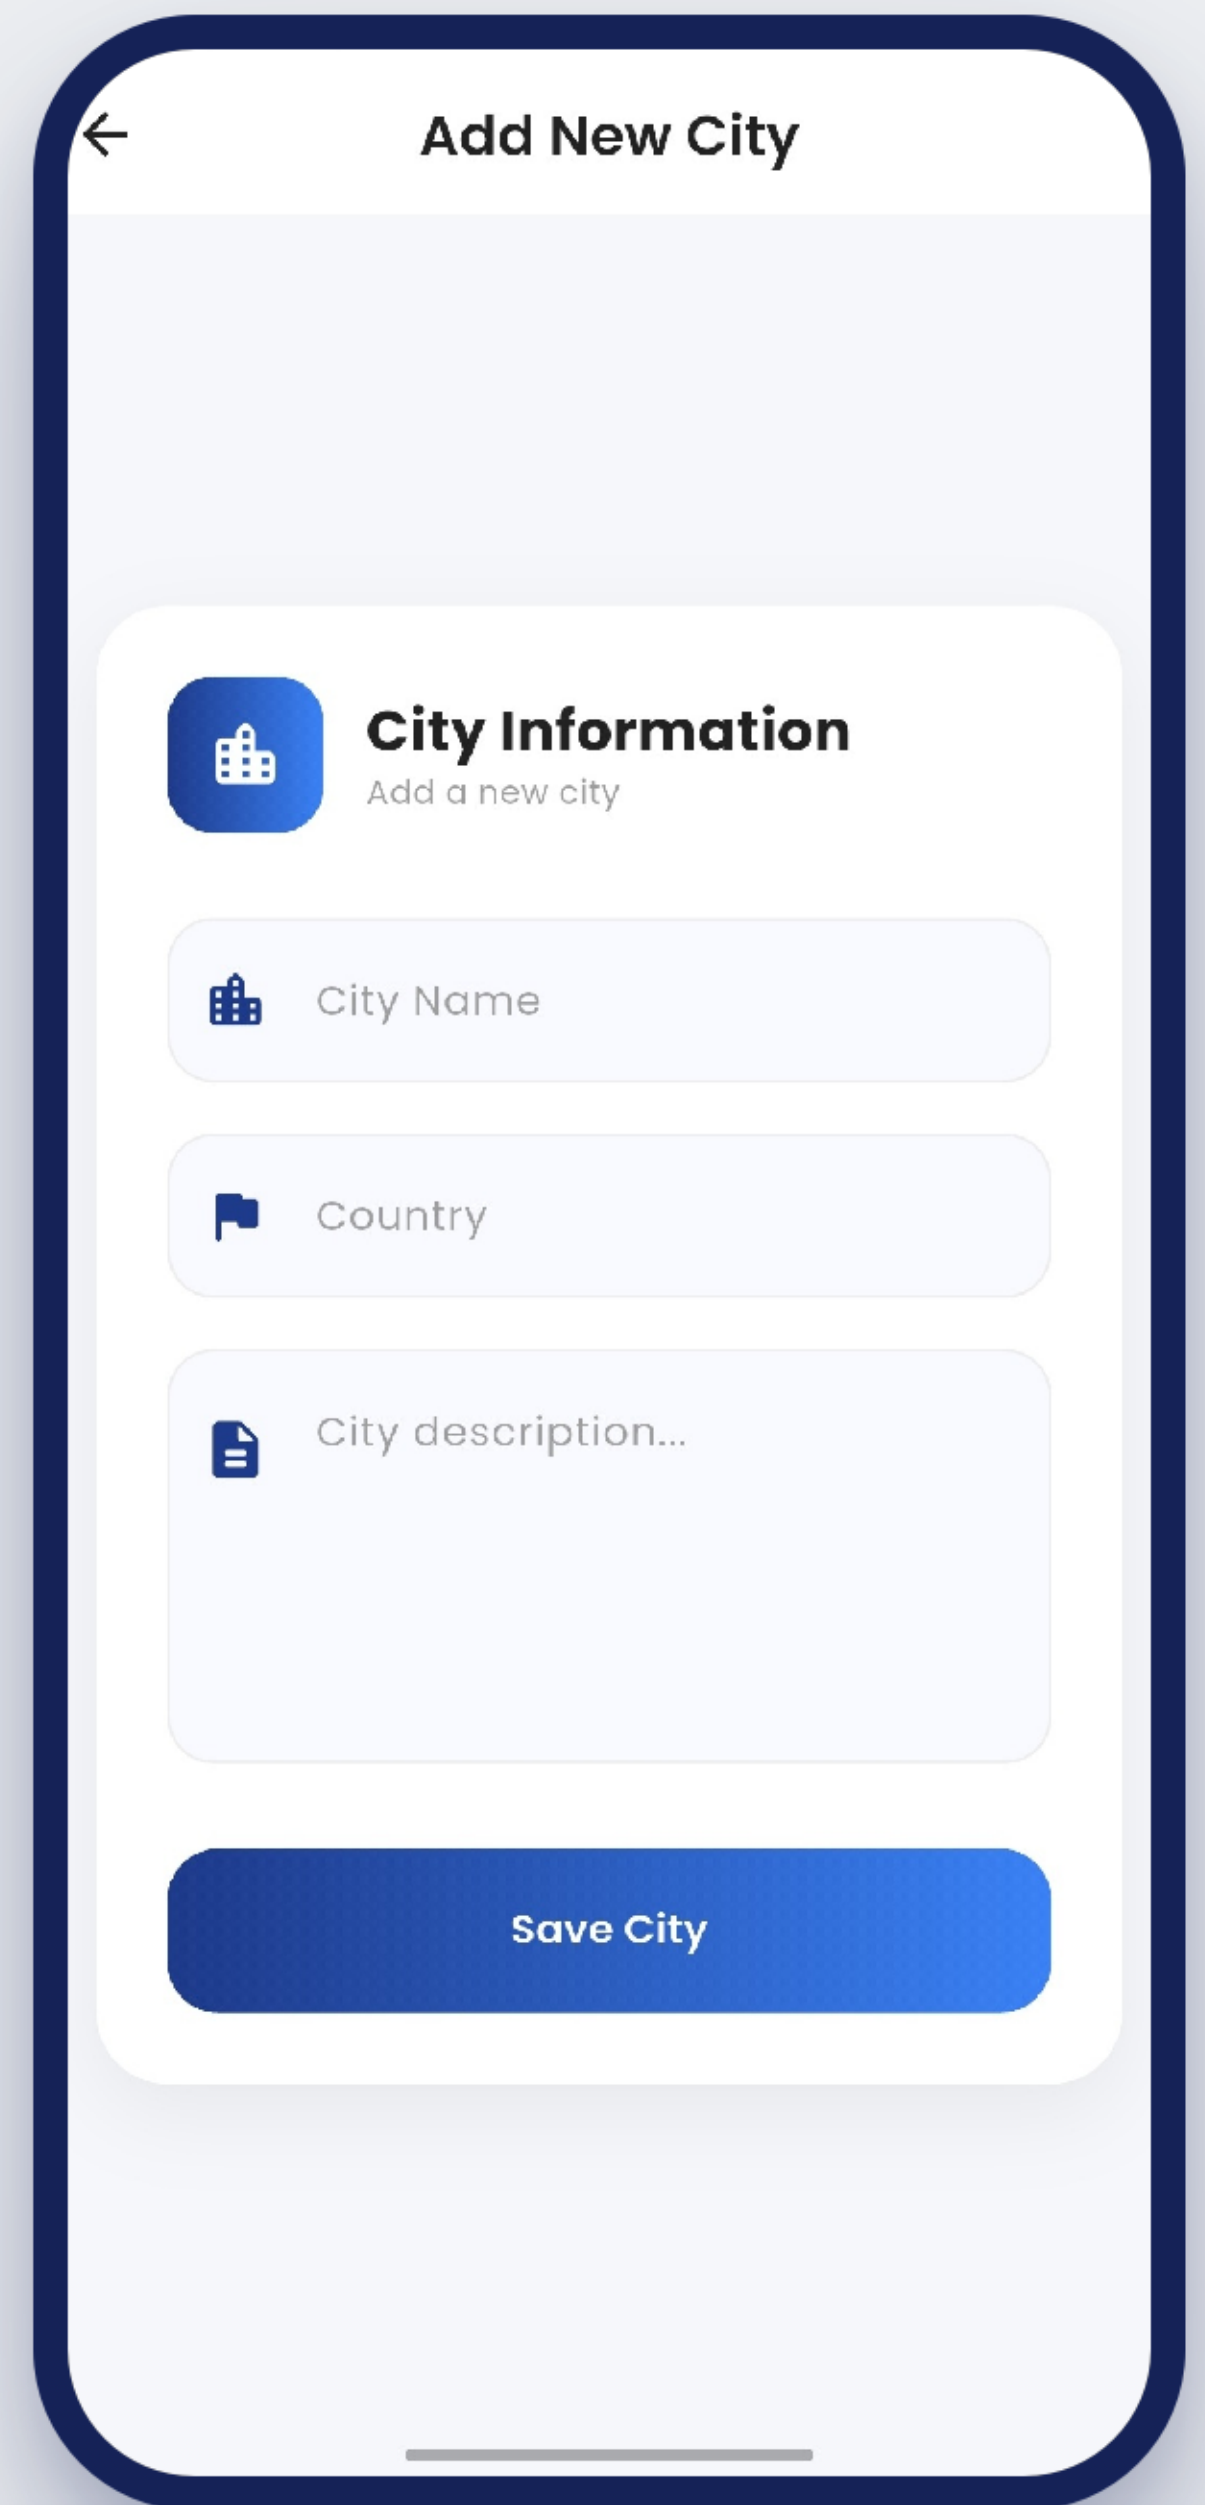

Manage Cities

View, search, and manage every city in the app, with instant delete controls for outdated entries.

Add New City

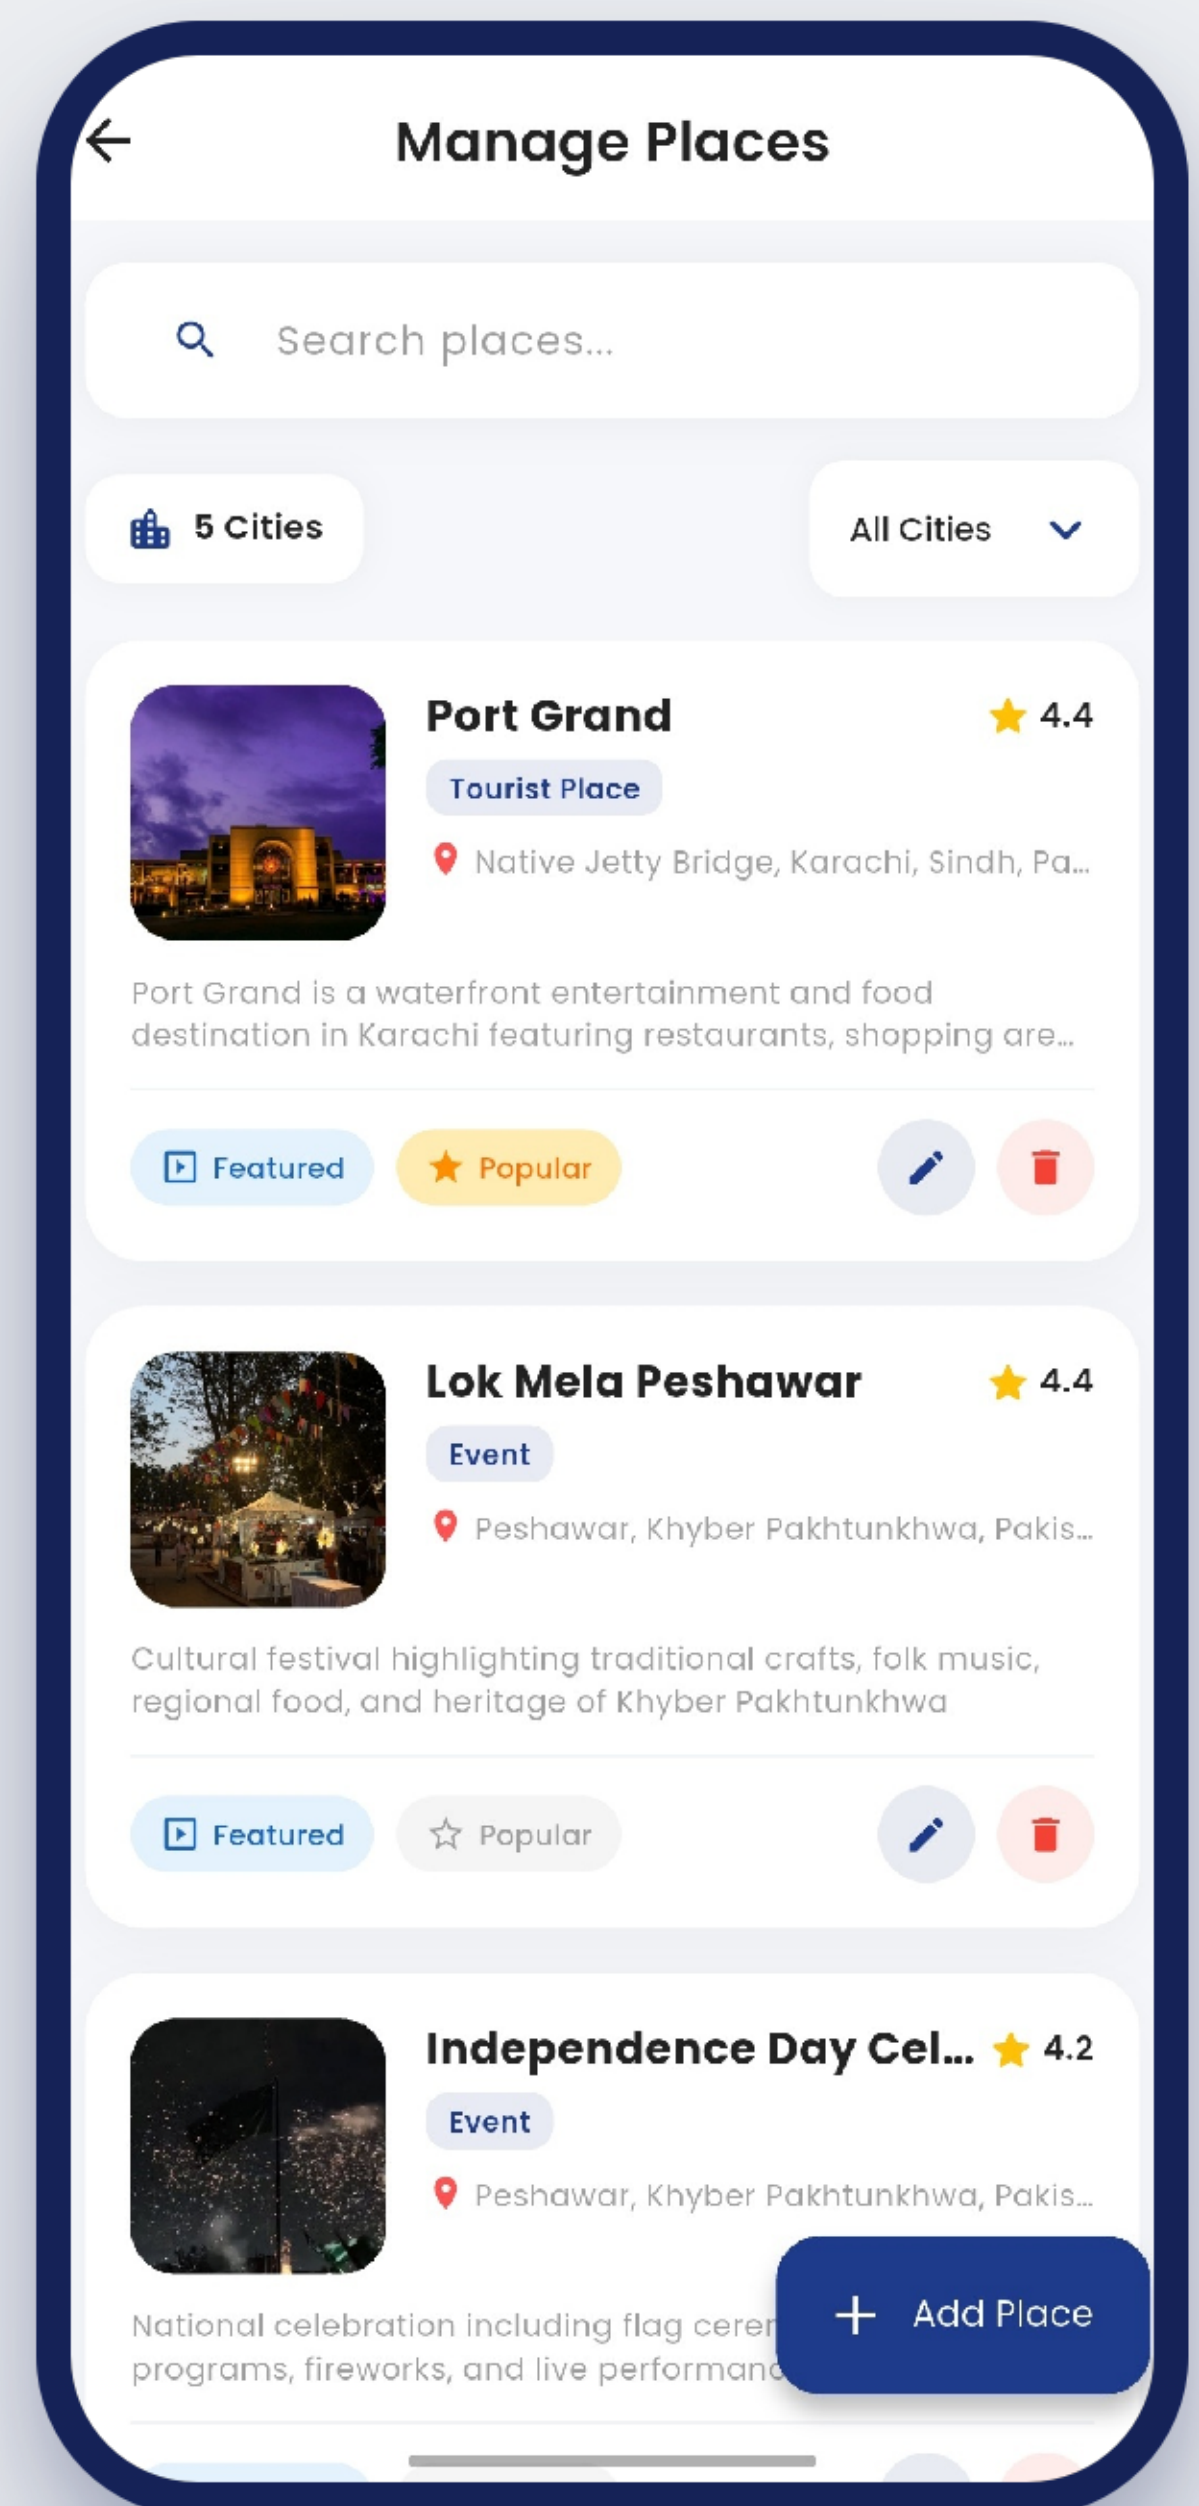

A simple form to add new cities — name, country, and description — expanding the app's coverage in seconds.

The mockup shows a mobile app interface for adding a new city. At the top, there is a back arrow and the title 'Add New City'. Below this is a section titled 'City Information' with a subtitle 'Add a new city'. This section contains three input fields: 'City Name' (with a building icon), 'Country' (with a flag icon), and 'City description...' (with a document icon). At the bottom of the form is a blue button labeled 'Save City'.

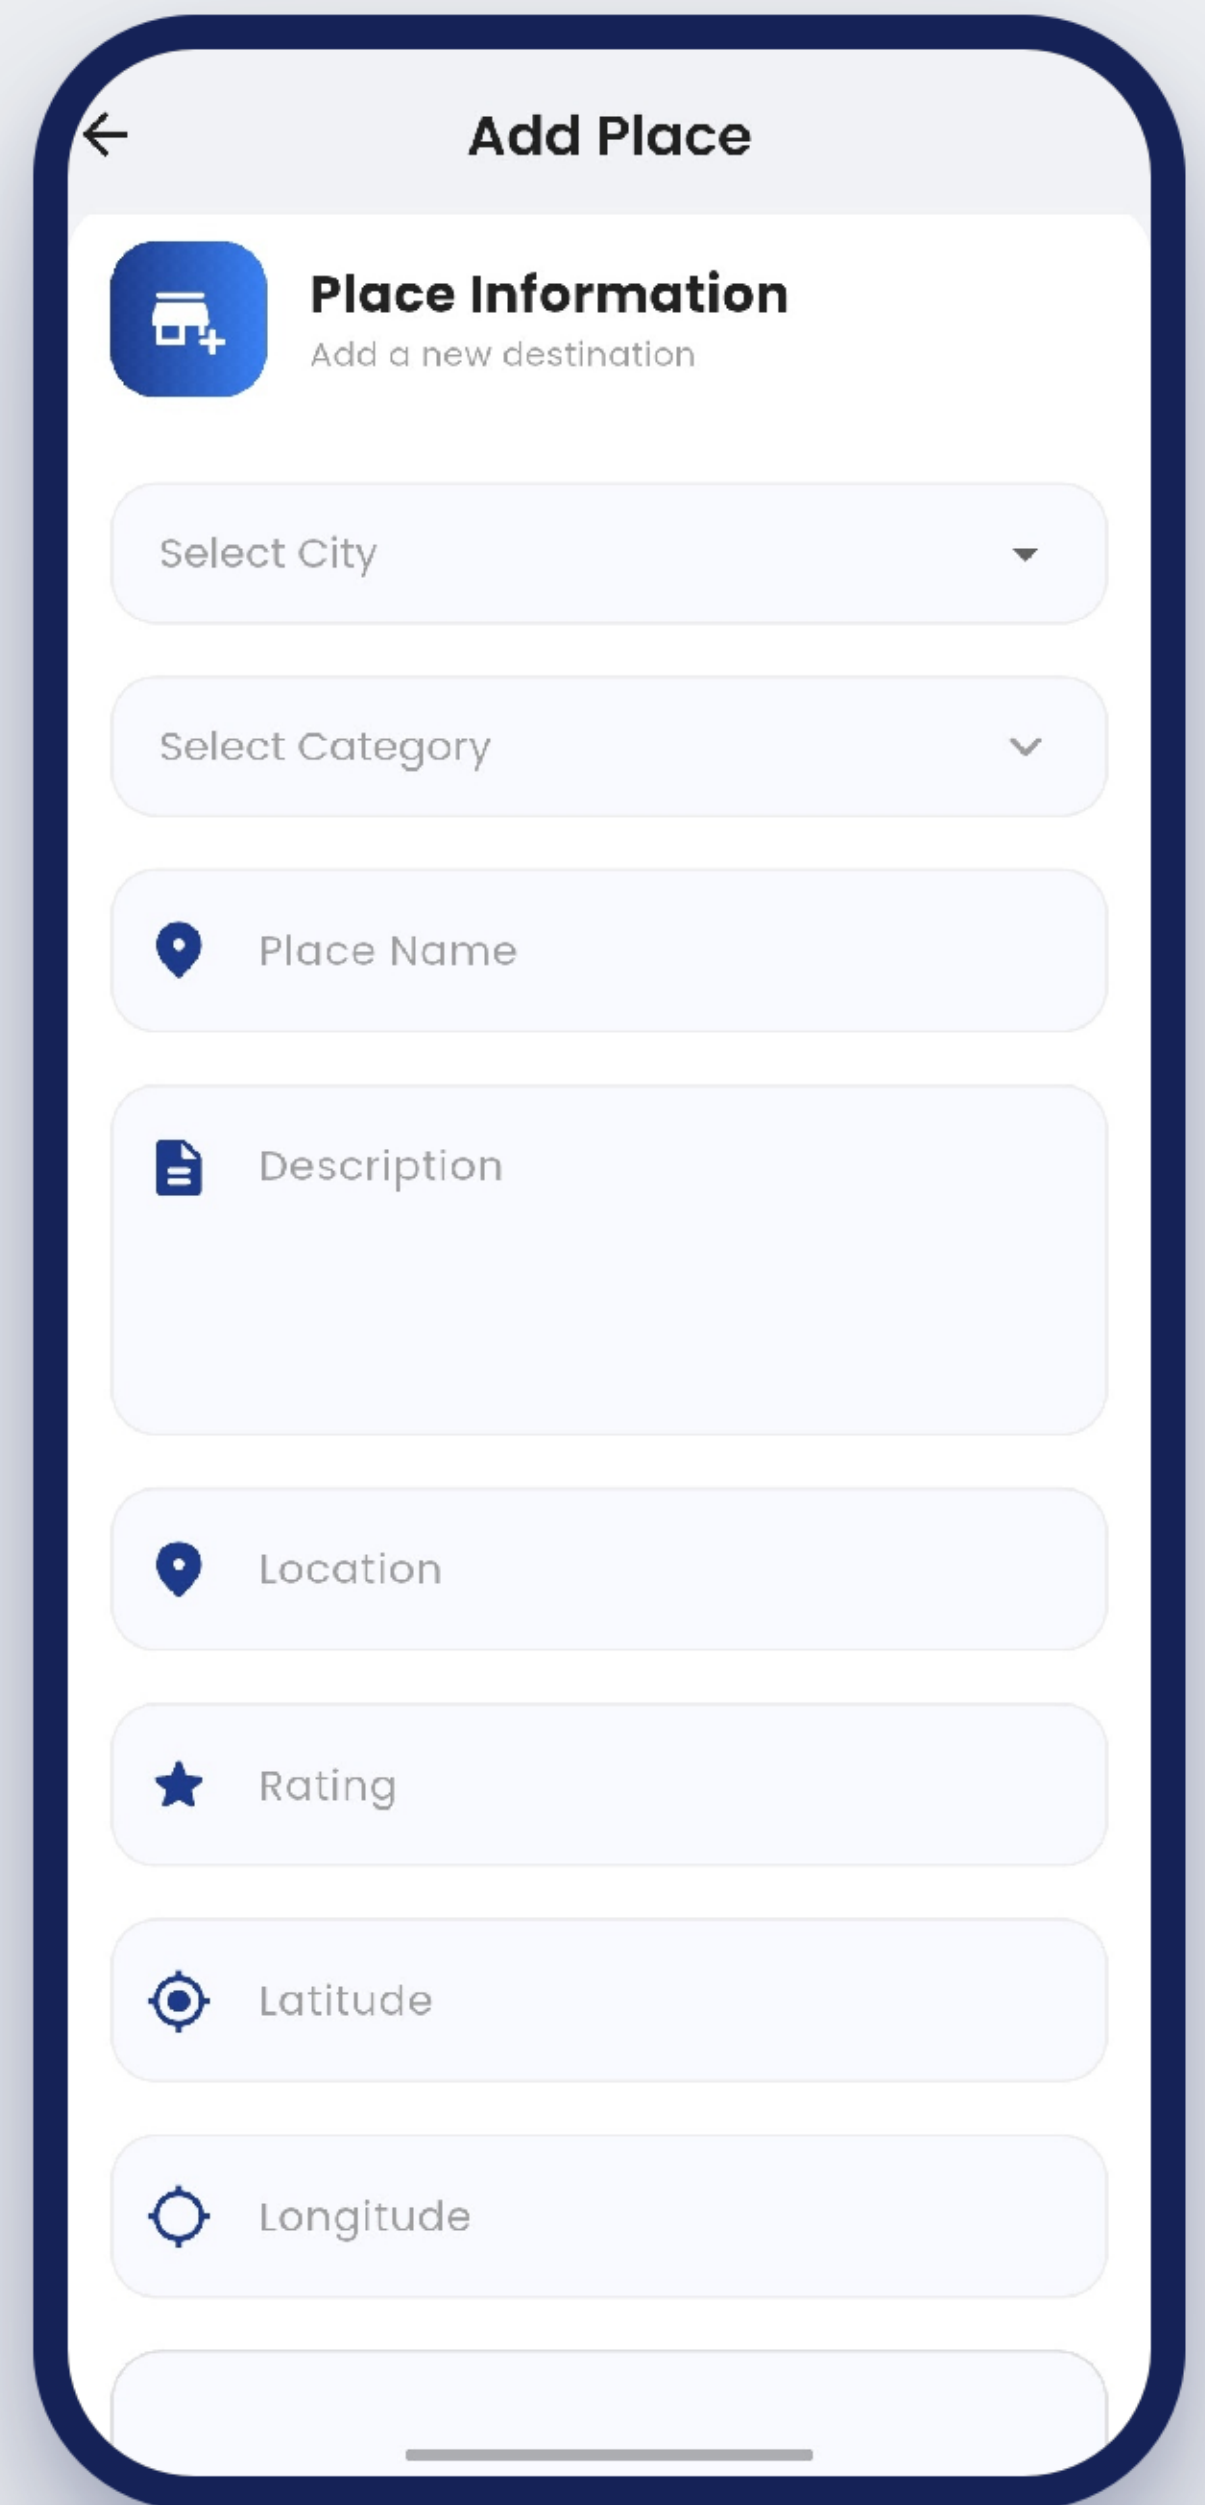

Manage Places

Every listed destination in one place — edit details, toggle featured/popular status, or remove entries instantly.

Add Place

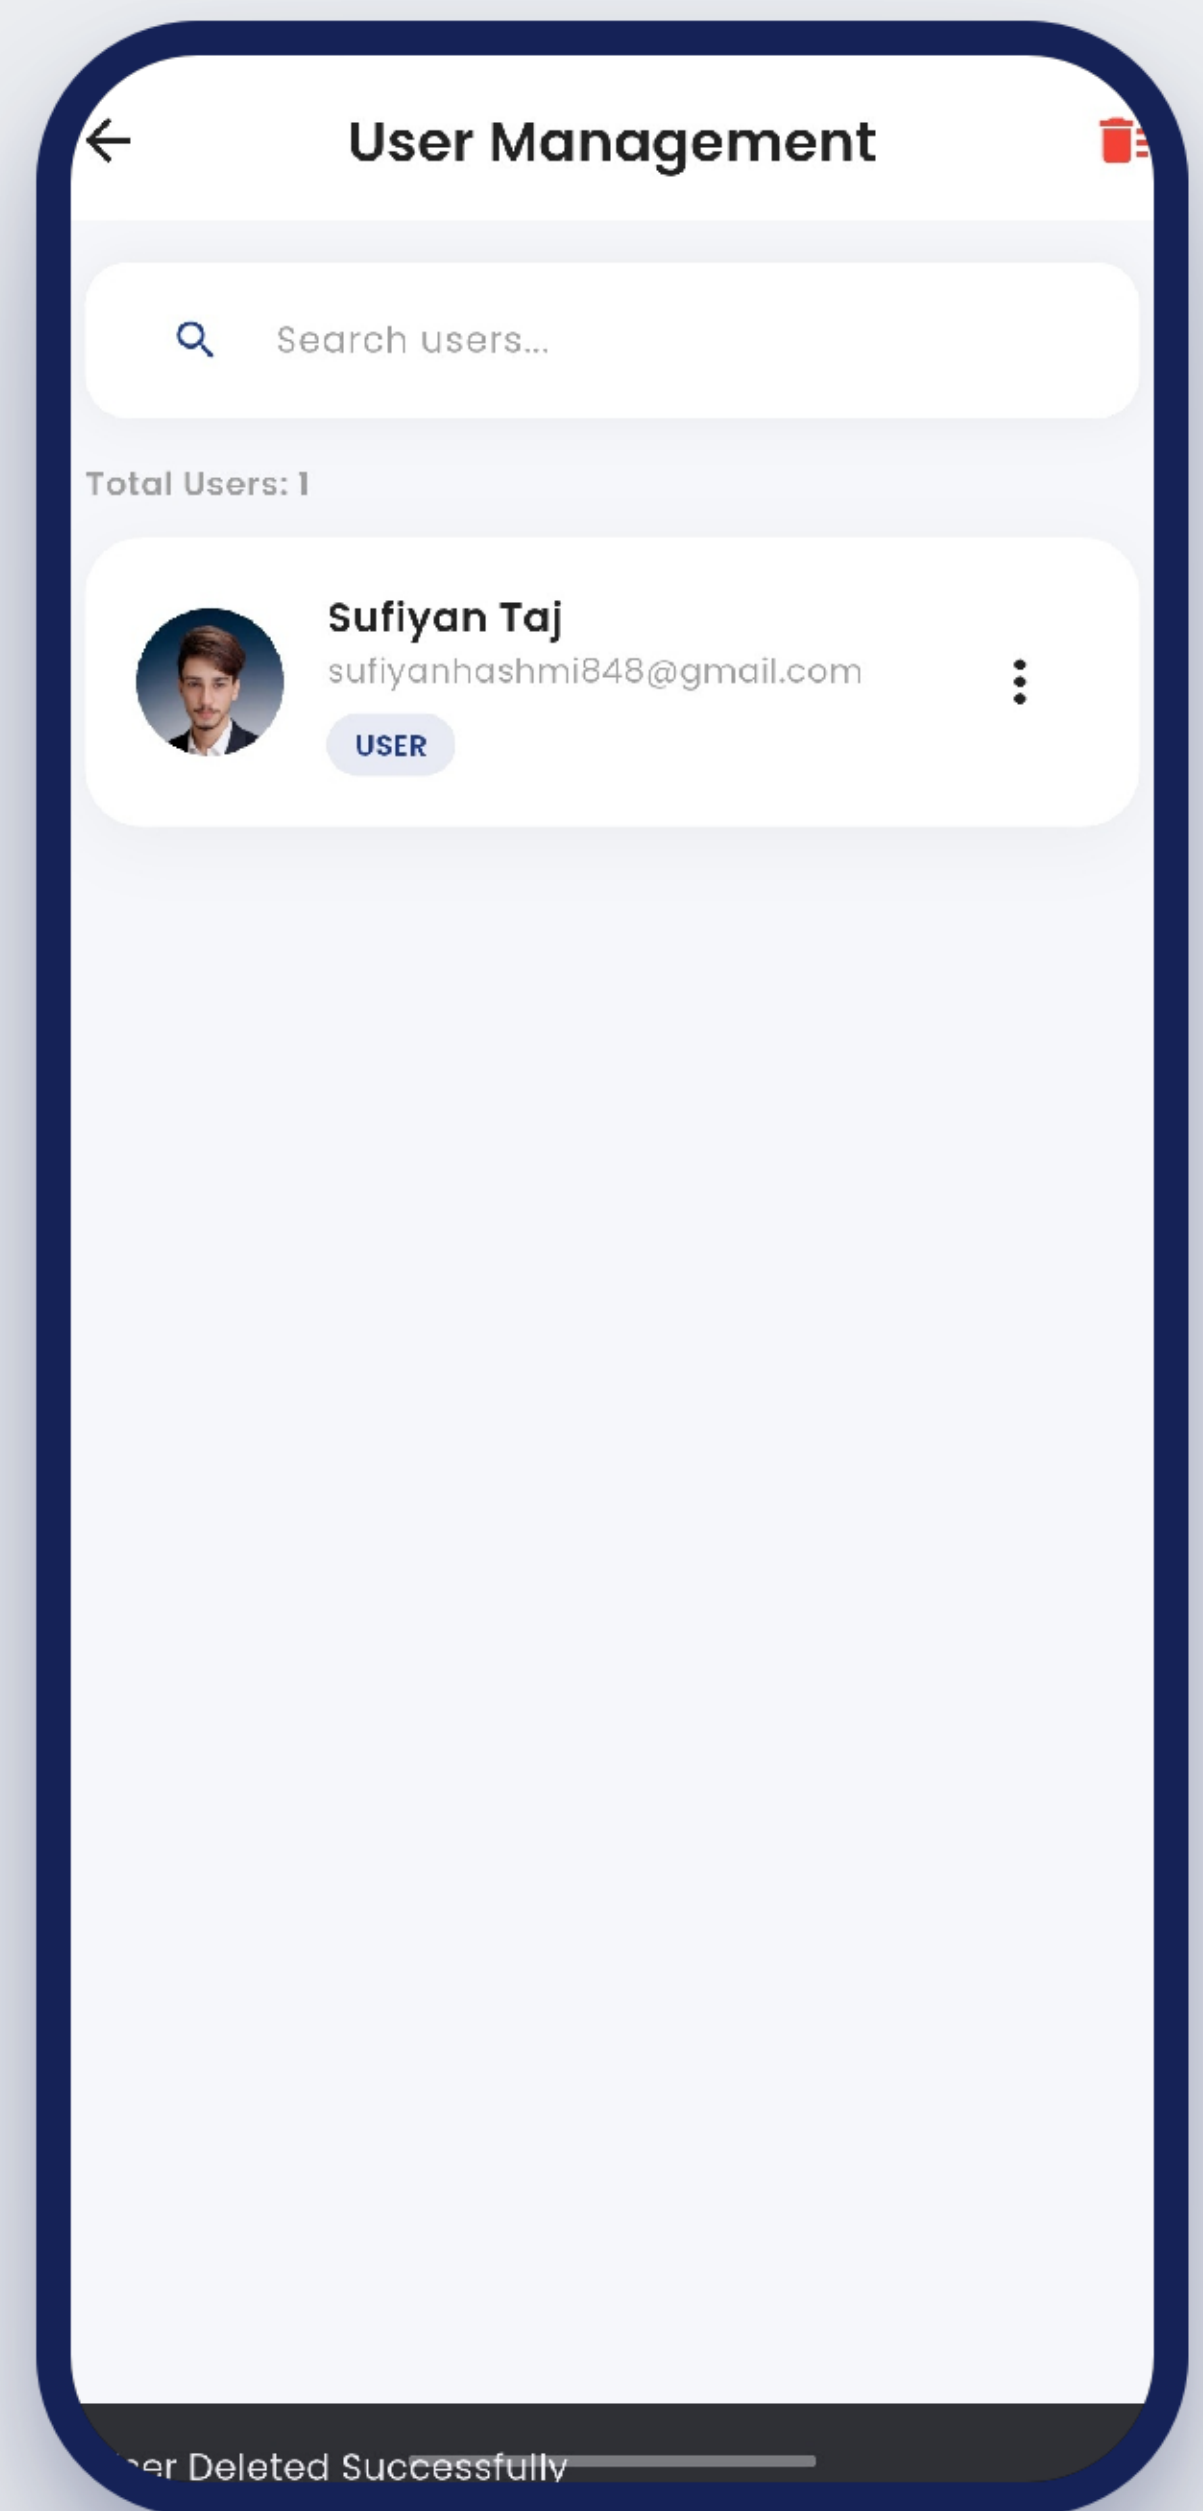

A detailed form for adding new destinations — city, category, location, rating, and coordinates.

The image shows a mobile application interface for adding a new place. The screen has a dark blue header with a back arrow and the title "Add Place". Below the header is a section titled "Place Information" with a subtitle "Add a new destination". The form consists of several input fields: "Select City" (a dropdown menu), "Select Category" (a dropdown menu), "Place Name" (a text field with a location pin icon), "Description" (a text area with a document icon), "Location" (a text field with a location pin icon), "Rating" (a text field with a star icon), "Latitude" (a text field with a location pin icon), and "Longitude" (a text field with a location pin icon). The form is styled with a light blue background and rounded corners.

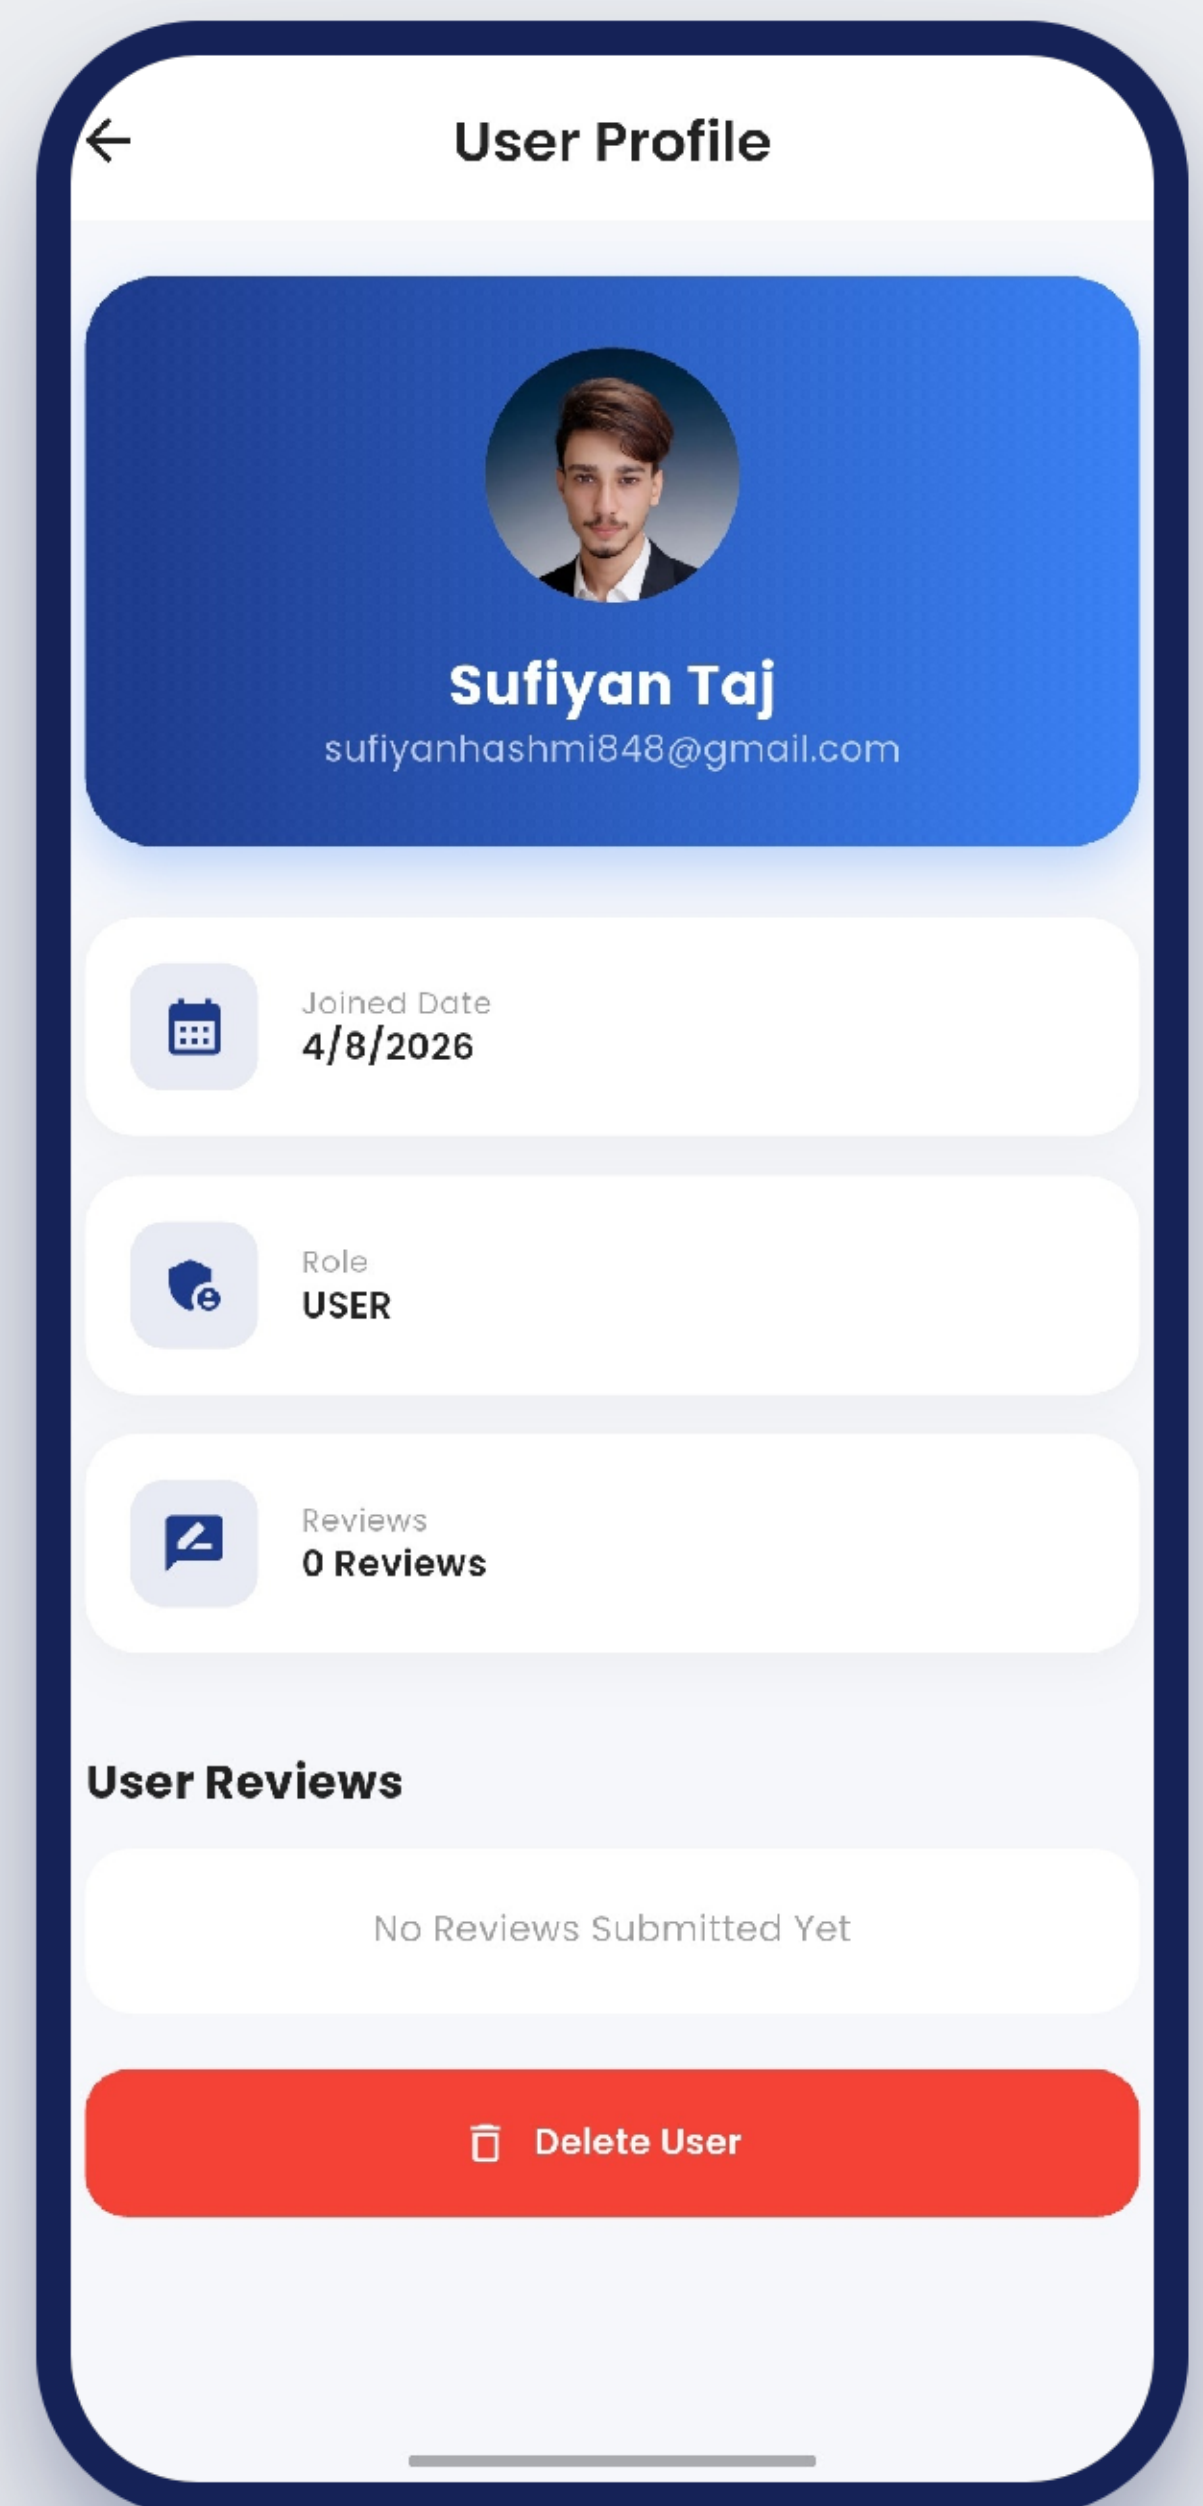

User Management

View every registered user and manage accounts directly from the admin panel.

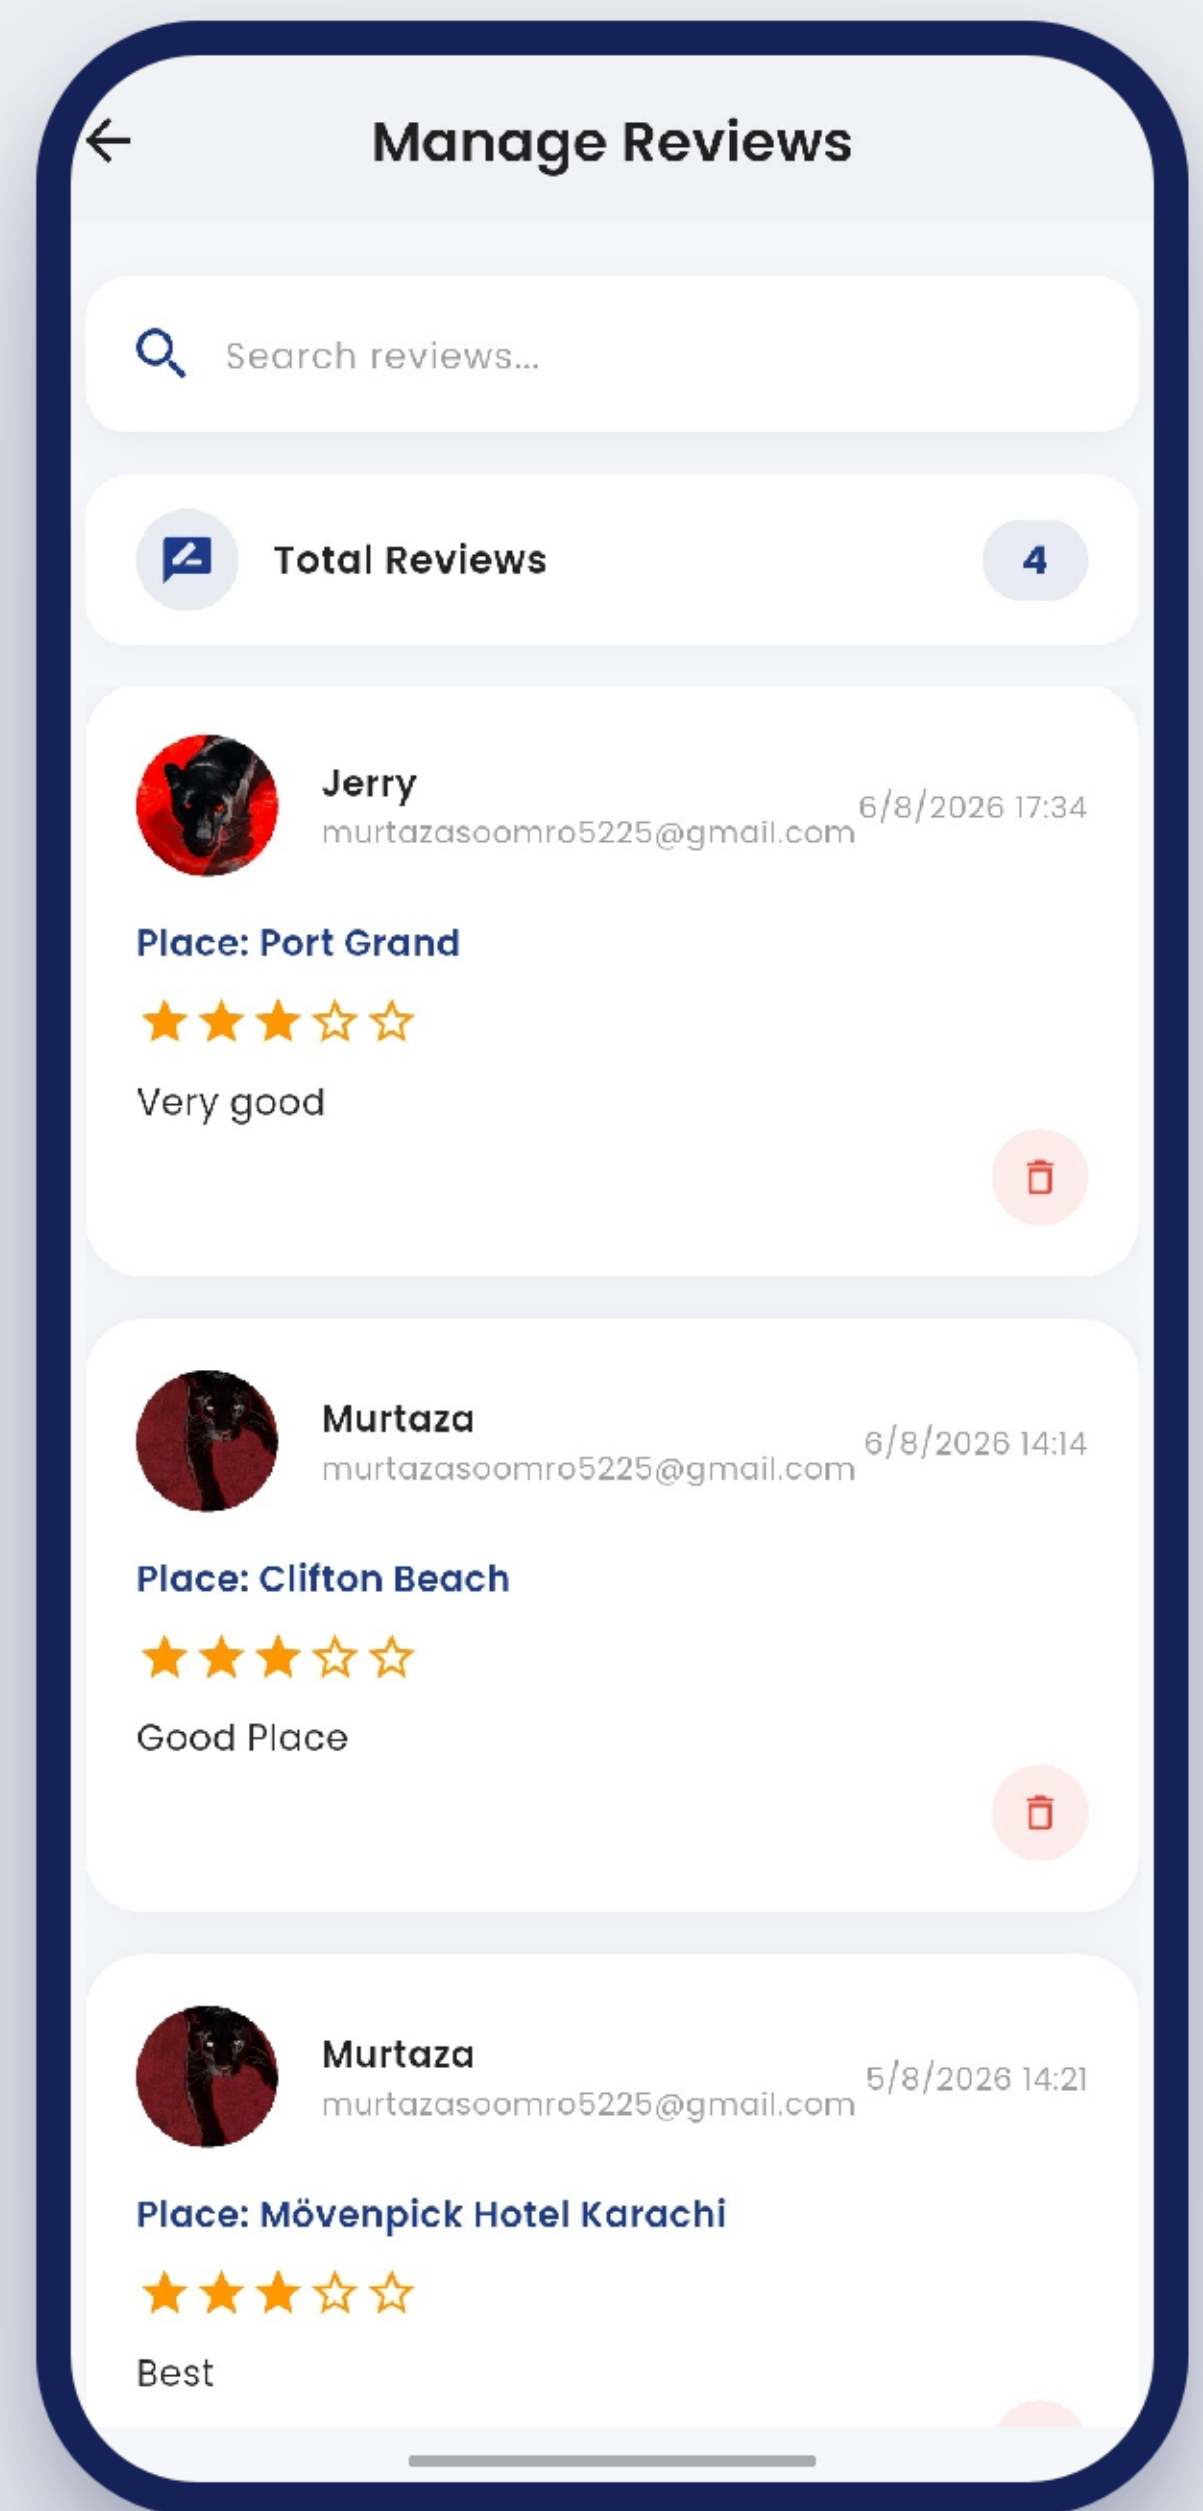

User Profile (Admin)

Admins can view full user details — join date, role, review history — and remove accounts when needed.

Manage Reviews

Moderate user reviews across all places, with the ability to remove inappropriate or spam content.

Let's build something like *this*.

Have an app idea? Let's turn it into a real, working product — designed with care and built to perform.
